#### □ SAFETY PRECAUTIONS

#### **CAUTION:**

#### TO REDUCE THE RISK OF ELECTRIC SHOCK, DO NOT REMOVE COVER (OR BACK). NO USER-SERVICEABLE PARTS INSIDE. **REFER SERVICING TO QUALIFIED SERVICE PERSONNEL.**

The lightning flash with arrowhead symbol, within an equilateral triangle, is intended to alert the user to the presence of uninsulated "dangerous voltage" within the product's enclosure that may be of sufficient magnitude to constitute a risk of electric shock to persons.

T

The exclamation point within an equilateral triangle is intended to alert the user to the presence of important operating and maintenance (servicing) instructions in the literature accompanying the appliance.

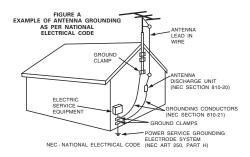

#### WARNING:

TO REDUCE THE RISK OF FIRE OR ELECTRIC SHOCK, DO NOT EXPOSE THIS APPLIANCE TO RAIN OR MOISTURE.

- before the product is operated
- 2. Retain Instructions The safety and operating instructions should be retained for future reference.
- 3. Heed Warnings - All warnings on the product and in the operating instructions should be adhered to.
- 4 Follow Instructions - All operating and use instructions should be followed.
- 5. Cleaning – Unplug this product from the wall outlet before cleaning. Do not use liquid cleaners or aerosol cleaners.
- 6. Attachments Do not use attachments not recommended by the product manufacturer as they may cause hazards.
- 7. Water and Moisture – Do not use this product near water – for example, near a bath tub, wash bowl, kitchen sink, or laundry tub; in a wet basement: or near a swimming pool; and the like.
- 8. Accessories – Do not place this product on an unstable cart, stand, tripod. bracket, or table. The product may fall, causing serious injury to a child or adult, and serious damage to the product. Use only with a cart, stand, tripod, bracket, or table recommended by the manufacturer, or sold with the product. Any mounting of the product should

follow the manufacturer's instructions, and should use a mounting accessory recommended by the manufacturer.

- 9. A product and cart combination should be moved with care. Quick stops, excessive force, and uneven surfaces may cause the product and cart combination to overturn.
- 10. Ventilation Slots and openings in the cabinet are provided for ventilation and to ensure reliable operation of the product and to protect it from overheating, and these openings must not be blocked or covered. The openings should never be blocked by placing the product on a bed, sofa, rug, or other similar surface. This product should not be placed in a built-in or the manufacturer's instructions have been adhered to.
- 11. Power Sources This product should be operated only from the type of power source indicated on the marking label. If you are not sure of the type of power supply to your home, consult your product dealer or local power company. For products intended to operate from battery power, or other sources, refer to the operating instructions.
- 12. Grounding or Polarization This product may be equipped with a polarized alternating-current line plug (a plug having one blade wider than the other). This plug will fit into the power outlet only one way. This is a safety feature. If you are unable to insert the plug fully into the outlet, try reversing the plug. If the plug should still fail to fit, contact your electrician to replace your obsolete outlet. Do not defeat the safety purpose of the polarized plug.

- 1. Read Instructions All the safety and operating instructions should be read 13. Power-Cord Protection Power-supply cords should be routed so that they are not likely to be walked on or pinched by items placed upon or against them, paying particular attention to cords at plugs, convenience receptacles, and the point where they exit from the product.
  - 15. Outdoor Antenna Grounding If an outside antenna or cable system is connected to the product, be sure the antenna or cable system is grounded so as to provide some protection against voltage surges and built-up static charges. Article 810 of the National Electrical Code, ANSI/NFPA 70, provides information with regard to proper grounding of the mast and supporting structure, grounding of the lead-in wire to an antenna discharge unit, size of grounding conductors, location of antenna-discharge unit, connection to grounding electrodes, and requirements for the grounding electrode. See Figure A.
  - 16. Lightning For added protection for this product during a lightning storm. or when it is left unattended and unused for long periods of time, unplug it from the wall outlet and disconnect the antenna or cable system. This will prevent damage to the product due to lightning and power-line surges.
  - Power Lines An outside antenna system should not be located in the 17. vicinity of overhead power lines or other electric light or power circuits, or where it can fall into such power lines or circuits. When installing an outside antenna system, extreme care should be taken to keep from touching such power lines or circuits as contact with them might be fatal.
  - 18. Overloading Do not overload wall outlets, extension cords, or integral convenience receptacles as this can result in a risk of fire or electric shock.
  - 19 Object and Liquid Entry - Never push objects of any kind into this product through openings as they may touch dangerous voltage points or short-out parts that could result in a fire or electric shock. Never spill liquid of any kind on the product.
  - 20. Servicing Do not attempt to service this product yourself as opening or removing covers may expose you to dangerous voltage or other hazards. Refer all servicing to qualified service personnel.
  - installation such as a bookcase or rack unless proper ventilation is provided 21. Damage Requiring Service Unplug this product from the wall outlet and refer servicing to gualified service personnel under the following conditions:
    - a) When the power-supply cord or plug is damaged,
    - b) If liquid has been spilled, or objects have fallen into the product,
    - c) If the product has been exposed to rain or water.
    - d) If the product does not operate normally by following the operating instructions. Adjust only those controls that are covered by the operating instructions as an improper adjustment of other controls may result in damage and will often require extensive work by a qualified technician to restore the product to its normal operation,
    - e) If the product has been dropped or damaged in any way, and
    - f) When the product exhibits a distinct change in performance this indicates a need for service.
    - 22. Replacement Parts When replacement parts are required, be sure the service technician has used replacement parts specified by the manufacturer or have the same characteristics as the original part. Unauthorized substitutions may result in fire, electric shock, or other hazards.
    - 23. Safety Check Upon completion of any service or repairs to this product, ask the service technician to perform safety checks to determine that the product is in proper operating condition.
    - 24. Wall or Ceiling Mounting The product should be mounted to a wall or ceiling only as recommended by the manufacturer.
    - Heat The product should be situated away from heat sources such as 25. radiators, heat registers, stoves, or other products (including amplifiers) that produce heat.

#### FCC Information (For US customers)

#### 1. COMPLIANCE INFORMATION

#### Product Name: AV Surround Receiver Model Number: AVR-4308CI

#### This product contains FCC ID: BV2- MPGBR052.

This product complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this product may not cause harmful interference, and (2) this product must accept any interference received, including interference that may cause undesired operation.

Denon Electronics (USA), LLC 100 Corporate Drive, Marwah, NJ 07430-2041 Tel. 201-762-6500 (Main)

#### 2. IMPORTANT NOTICE: DO NOT MODIFY THIS PRODUCT

This product, when installed as indicated in the instructions contained in this manual, meets FCC requirements. Modification not expressly approved by DENON may void your authority, granted by the FCC, to use the product.

#### 3. CAUTION

- To comply with FCC RF exposure compliance requirement, separation distance of at least 20 cm must be maintained between the antenna of this product and all persons.
- This product and its antenna must not be co-located or operating in conjunction with any other antenna or transmitter.

#### 4. NOTE

This product has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation.

This product generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this product does cause harmful interference to radio or television reception, which can be determined by turning the product OFF and ON, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the product into an outlet on a circuit different from that to which the receiver is connected.
- Consult the local retailer authorized to distribute this type of product or an experienced radio/TV technician for help.

#### IC Information (For Canadian customers)

#### 1. PRODUCT

#### This product contains IC 6963A-MPGBR052.

This product complies with RSS-210 of Industry Canada. Operation is subject to the following two conditions: (1) this product may not cause harmful interference, and (2) this product must accept any interference received, including interference that may cause undesired operation.

This Class B digital apparatus complies with Canadian ICES-003.

#### APPAREIL

#### Cet appareil contiens IC 6963A- MPGBR052.

Cet appareil est conforme à la norme CNR-210 du Canada. L'utilisation de ce dispositif est autorisée seulement aux deux conditions suivantes : (1) il ne doit pas produire de brouillage, et (2) l'utilisateur du dispositif doit être prêt à accepter tout brouillage radioélectrique reçu, même si ce brouillage est susceptible de compromettre le fonctionnement du dispositif.

Cet appareil numérique de la classe B est conforme à la norme NMB-003 du Canada.

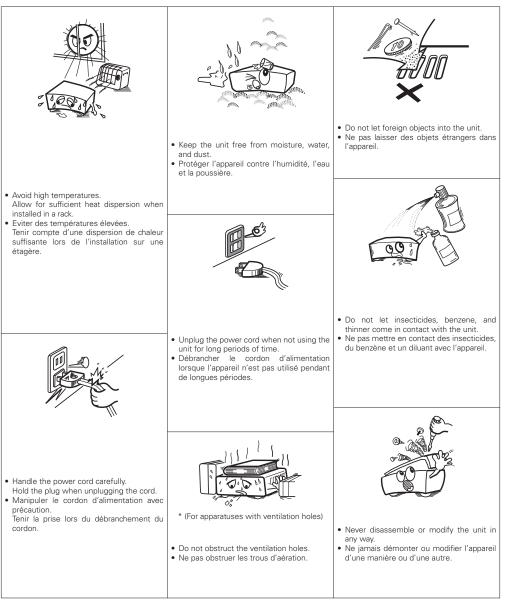

#### 2. CAUTION

To reduce potential radio interference to other users, the antenna type and its gain should be so chosen that the equivalent isotropically radiated power (e.i.r.p.) is not more than that permitted for successful communication.

#### ATTENTION

Afin de réduire le risque d'interférence aux autres utilisateurs, il faut choisir le type d'antenne et son gain de façon à ce que la puissance isotrope rayonnée équivalente (p.i.r.e.) ne soit pas supérieure au niveau requis pour l'obtention d'une communication satisfaisante.

# **Getting Started**

Thank you for purchasing this DENON product. To ensure proper operation, please read this owner's manual carefully before using the product.

After reading them, be sure to keep them for future reference.

# **Cautions on Handling**

#### • Before turning the power switch on

Check once again that all connections are correct and that there are no problems with the connection cables.

 Power is supplied to some of the circuitry even when the unit is set to the standby mode. When traveling or leaving home for long periods of time, be sure to unplug the power cord from the power outlet.

#### • About condensation

If there is a major difference in temperature between the inside of the unit and the surroundings, condensation (dew) may form on the operating parts inside the unit, causing the unit not to operate properly.

If this happens, let the unit sit for an hour or two with the power turned off and wait until there is little difference in temperature before using the unit.

#### • Cautions on using mobile phones

Using a mobile phone near this unit may result in noise. If so, move the mobile phone away from this unit when it is in use.

#### Moving the unit

Turn off the power and unplug the power cord from the power outlet.

Next, disconnect the connection cables to other system units before moving the unit.

 Note that the illustrations in these instructions may differ from the actual unit for explanation purposes.

# **Cautions on Installation**

#### Note:

For proper heat dispersal, do not install this unit in a confined space, such as a bookcase or similar enclosure.

# 

Wall

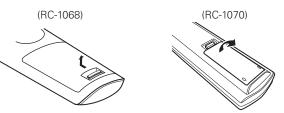

# **About the Remote Control Unit**

In addition to the AVR-4308CI, the included main remote control unit (RC-1068) can also be used to operate the equipment listed below. ① DENON system components

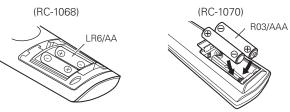

- Non-DENON system components
  - By setting the preset memory (12 page 64 ~ 66)
  - By using the learn function (12 page 67)

### **Inserting the Batteries**

① Lift the clasp and remove the rear lid.

② Load the two batteries properly as indicated by the marks in the battery compartment.

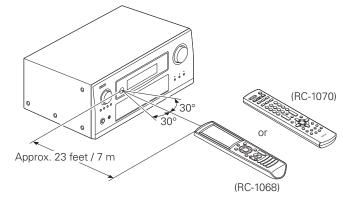

3 Put the rear cover back on.

#### NOTE

- Replace the batteries with new ones if the set does not operate even when the remote control unit is operated close to the unit.
- The supplied batteries are only for verifying operation.
- When inserting the batteries, be sure to do so in the proper direction, following the " $\Theta$ " and " $\Theta$ " marks in the battery compartment.
- To prevent damage or leakage of battery fluid:
- Do not use a new battery together with an old one.
- Do not use two different types of batteries.
- Do not attempt to charge dry batteries.
- Do not short-circuit, disassemble, heat or dispose of batteries in flames.
- If the battery fluid should leak, carefully wipe the fluid off the inside of the battery compartment and insert new batteries.
- Remove the batteries from the remote control unit if it will not be in use for long periods.
- When replacing the batteries, have the new batteries ready and insert them as quickly as possible.

#### **Operating Range of the Remote Control Unit**

Point the remote control unit at the remote sensor when operating it.

#### NOTE

The set may function improperly or the remote control unit may not operate if the remote control sensor is exposed to direct sunlight, strong artificial light from an inverter type fluorescent lamp or infrared light.

Troubleshooting

# Connections

Connections for all compatible audio and video signal formats are described in these operating instructions. Please select the types of connections suited for the equipment you are connecting. With some types of connections, certain settings must be made on the AVR-4308Cl. For details, refer to the instructions for the respective connection items below.

#### NOTE

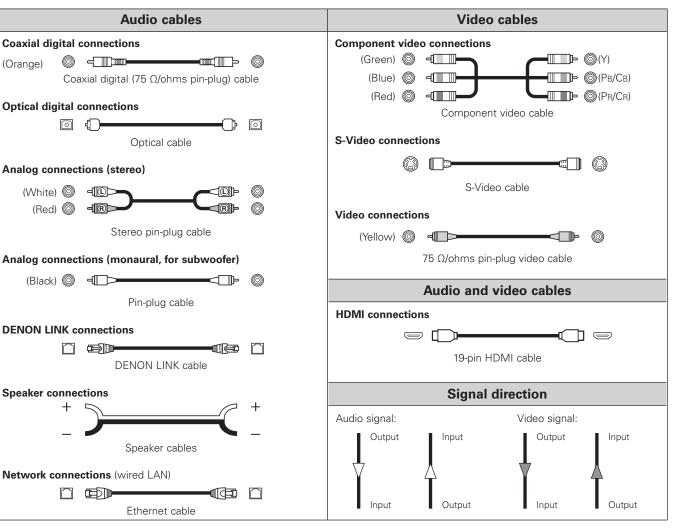

- Do not plug in the power cord until all connections have been completed.
- When making connections, also refer to the operating instructions of the other components.
- Be sure to connect the left and right channels properly (left with left, right with right).
- Do not bundle power cords together with connection cables. Doing so can result in humming or noise.

# **Preparations**

(Orange)

#### **Cables Used for Connections**

Select the cables according to the equipment being connected.

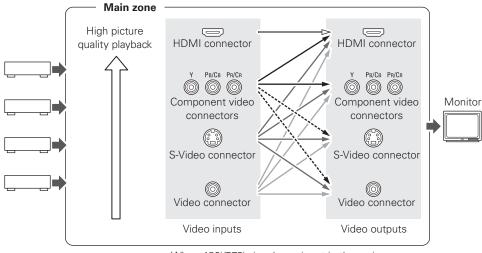

#### **Video Conversion Function**

- This function automatically converts various formats of video signals input to the AVR-4308Cl into the format used to output the video signals from the AVR-4308Cl to a monitor.
- The AVR-4308CI's video input/output circuitry is compatible with the following four types of video signals:

#### Digital video signals: HDMI

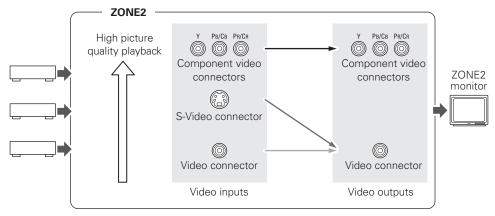

Analog video signals: Component video, S-Video and Video

#### [Flow of video signals inside the AVR-4308CI]

----: When 480i/576i signals are input in the main zone

#### [Flow of video signals for ZONE2]

- When not using this function, connect a monitor output with the same type of connector as the video input connector.
- The resolution of the HDMI input-compatible monitor connected to the AVR-4308CI can be checked at GUI menu "Information" "HDMI Information" "Monitor1" or "Monitor2" (ICP page 48).

#### NOTE

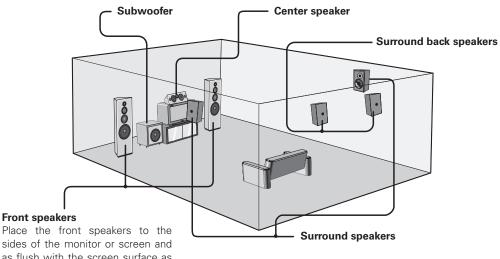

¢

- HDMI signals cannot be converted into analog signals.
- 1080p component input video signals cannot be output to anything other than component video connectors.
- 480p/576p, 1080i and 720p component video input signals cannot be converted into S-Video or Video format.
- When using the component video output connectors for connection to the ZONE2 monitor, the ZONE2's on-screen display is not displayed.
- When a non-standard video signal from a game machine or some other source is input, the video conversion function might not operate.

# **Speaker Connections**

#### **Speaker Installation**

The illustration below shows a basic example of installation of the amplifier combined with 8 speakers and a monitor.

#### Front speakers

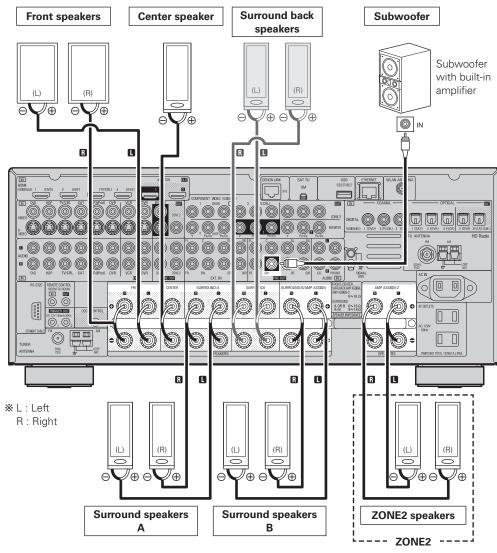

sides of the monitor or screen and as flush with the screen surface as possible.

The table below shows a typical speaker configuration for the AVR-4308CI.

	Fro	ont		Surround A Surround B		Surround back					
	L	R	Center	L	R	L	R	L	R	1 only	Subwoofer
7.1-channels (Surround A+B)	0	0	0	0	0	0	0	0	0	-	0

#### <u>\_</u>

When using just one surround back speaker, connect it to the left channel (SBL).

#### 

By default, the AVR-4308CI's "Amp Assign" setting is set to "ZONE2," so sound is not output simply by connecting a speaker to the surround back terminal. To use as the surround back speaker for the main zone, either turn the ZONE2 power off or change the "Amp Assign" setting (2 page 73, 74).

#### **Connecting the Speaker Cables**

Carefully check the left (L) and right (R) channels and + (red) and – (black) polarities on the speakers being connected to the AVR-4308CI, and be sure to interconnect the channels and polarities correctly.

**1** Peel off about 0.03 ft/10 mm of sheathing from the tip of the speaker cable, then either twist the core wire tightly or terminate it.

**2** Turn the speaker terr counterclockwise to loosen it.

**3** Insert the speaker cable's core wire to the hilt into the speaker terminal.

**4** Turn the speaker terminal clockwise to tighten it.

رے

#### When using a banana plug

Tighten the speaker terminal firmly before inserting the banana plug.

#### NOTE

- Use speakers with an impedance of 6 to 16  $\Omega$ /ohms. When using surround A and B speakers simultaneously, use speakers with an impedance of 8 to 16  $\Omega$ /ohms.
- Connect the speaker cables in such a way that they do not stick out of the speaker terminals. The protection circuit may be activated if the core wires touch the rear panel or if the + and – sides touch each other (1277 "Protection circuit").
- Never touch the speaker terminals while the power supply is connected. Doing so could result in electric shock.

#### **Protection circuit**

If speakers with an impedance lower than specified (for example 4  $\Omega$ /ohms speakers) are used for an extended period of time with the volume turned up high, the temperature may rise, activating the protection circuit.

When the protection circuit is activated, the speaker output is shut off and the power indicator flashes red. If this happens, unplug the power cord, then check the speaker cable and input cable connections. If the set is extremely hot, wait for it to cool off and improve ventilation around it. Once this is done, plug the power cord back in and turn the set's power back on.

If the protection circuit is activated again even though there are no problems in the ventilation around the set nor in the connections, the set may be damaged. Turn the power off, then contact a DENON service center.

# **Connecting Equipment with HDMI connectors**

With HDMI connections, the video and audio signals can be transferred with a single cable.

- \* The AVR-4308Cl is equipped for HDMI version 1.3a. This version is compatible with other versions, allowing connection to all components equipped with an HDMI connector.
- \* The AVR-4308CI is compatible with 30- and 36-bit Deep Color.

Compatible audio format	Details	Discs (examples)			
2-channel linear PCM	2ch 32-192 kHz 16/20/24 bits	CD, DVD-Video, DVD-Audio			
Multi-channel linear PCM	8ch 32-192 kHz 16/20/24 bits	DVD-Audio			
Dolby Digital, DTS	Bitstream	DVD-Video			
DSD	2/5.1ch 2.8224 MHz 1 bit	SACD			
Dolby Digital Plus, Dolby TrueHD, DTS-HD	Bitstream	HD DVD, Blu-ray Disc			

#### Copyright protection system (HDCP)

In order to play the digital video and audio signals of a DVD-Video or DVD-Audio disc using HDMI/DVI connections, both the connected DVD player and monitor must be equipped for a copyright protection system called "HDCP" (Highbandwidth Digital Content Protection).

HDCP is a copy protection technology consisting of data encoding and mutual identification of the devices. The AVR-4308Cl is HDCP-compatible. For details on the DVD player or monitor you are using, refer to its operating

instructions.

- By default, the HDMI audio signals are output from the speakers connected to the AVR-4308CI.
- To output the sound from the TV, make the settings at GUI menu "Manual Setup" "HDMI Setup"
- "Audio" "TV" (🖙 page 30).

# NOTE

• Use a CPPM-compatible DVD player to play DVD-Audio discs that are copyright-protected by CPPM.

- The AVR-4308CI cannot be controlled from another device via the HDMI cable.
- The audio signals output from the HDMI connector (sampling frequency, bit rate, etc.) may be restricted by the connected device.
- Video signals are not output properly when using devices that are not HDCP-compatible.
- Video signals are not output if the input video signals do not match the monitor's resolution. In this case, switch the DVD player's resolution to a resolution with which the monitor is compatible.
- If the GUI menu "Manual Setup" "HDMI Setup" "Audio" setting (P page 30) is set to "Amp", the sound may be interrupted when the monitor's power is turned off.
- Use a cable on which the HDMI logo is indicated (a certified HDMI product) for connection to the HDMI connector. Normal playback may not be possible when using a cable other than one on which the HDMI logo is indicated (a non-HDMI-certified product).
- If the monitor or DVD player does not support deep color, deep color signal transfer is not possible.
- If the monitor or DVD player does not support xvYCC, xvYCC signal transfer is not possible.
- If the monitor does not support "Auto Lipsync Correction" function, this function will not work.
- When the AVR-4308CI and DVD player are connected using an HDMI cable, also connect the AVR-4308CI and monitor using an HDMI cable.
- If the connected monitor or DVD player only has a DVI-D connector, use an HDMI/DVI converter cable. When using a DVI cable, no audio signals are transmitted.
- Use a Deep Color compatible cable for connection to Deep Color compatible devices.

#### When connecting with an HDMI/DVI converter cable (adapter)

• HDMI video signals are theoretically compatible with the DVI format.

When connecting to a monitor, etc., equipped with a DVI-D connector, connection is possible using an HDMI/DVI converter cable, but depending on the combination of components in some cases the video signals will not be output.

• When connecting using an HDMI/DVI converter adapter, the video signals may not be output properly due to poor connections with the connected cable, etc.

Getting Started

Connections

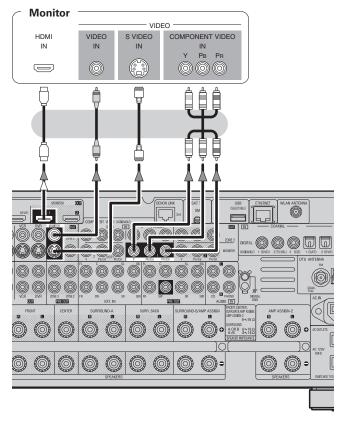

Setup

Playback

*.* 

# **Connecting the Monitor**

- Connect the cables to be used (127 page 8 "Video Conversion Function").
- With HDMI connections, the video and audio signals can be transferred with a single cable.
- To output the audio signals to the monitor with HDMI connections, set GUI menu "Manual Setup" "HDMI Setup" "Audio" to "TV" (27 page 30).

#### NOTE

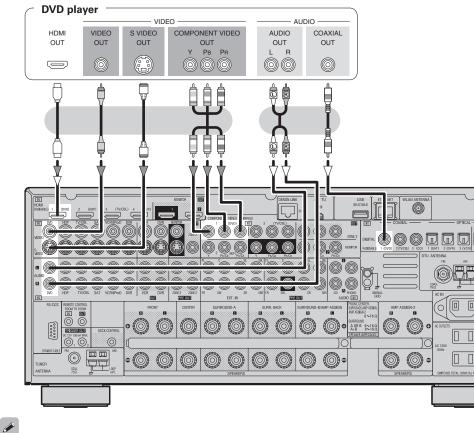

- The component video connectors may be indicated differently on your monitor. For details, see the monitor's operating instructions.
- The audio signals output from the HDMI connectors are only the HDMI input signals.

# **Connecting the Playback Components**

Carefully check the left (L) and right (R) channels and the inputs and outputs, and be sure to interconnect correctly.

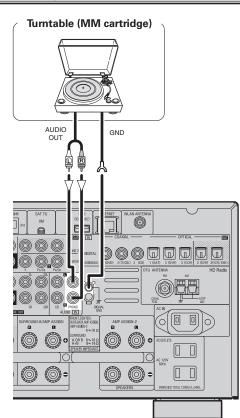

# **DVD Player**

- Connect the cables to be used.
- With HDMI connections, the video and audio signals can be transferred with a single cable.

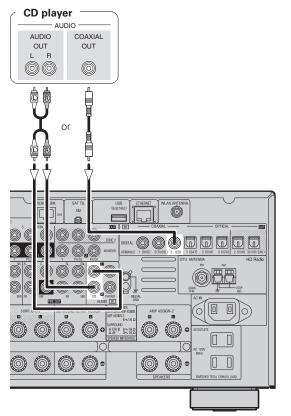

• Connect an HDP (High-Definition Player) in the same way.

• When using an optical cable for the digital audio connection, make the settings at GUI menu "Source Select" – "DVD" – "Assign" – "Digital" (1) page 42).

## **CD** Player

Connect the cables to be used.

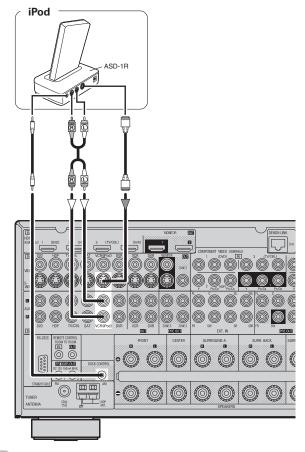

•

When using an optical cable for the digital audio connection, make the settings at GUI menu "Source Select" – "CD" – "Assign" – "Digital" (127) page 42).

#### iPod®

Use a DENON Control Dock for iPod (ASD-1R, sold separately) to connect the iPod to the AVR-4308CI. For instructions on the Control Dock for iPod settings, refer to the Control Dock for iPod's operating instructions.

#### Example :

- With the default settings, the iPod can be used connected to the VCR (iPod) connector.
- To assign the iPod to a connector other than VCR (iPod), make the settings at GUI menu "Source Select" "(input source to which iPod dock assigned)" "Assign" "iPod dock" (127) page 42).

**Getting Started** 

Connections

Setup

Playback

**Remote Control** 

Multi-Zone

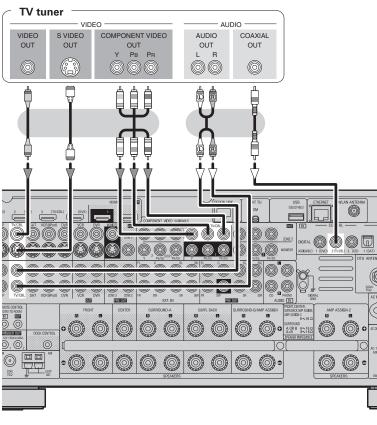

- When connecting a record player with an MC cartridge, use a commercially available MC head amplifier or a step-up transformer.
  Induction humming (a booming sound) may be produced from the
- speakers if the volume is raised with no record player connected.
- With some record players, noise may be generated when the ground wire is connected. If so, disconnect the ground wire.

#### NOTE

The AVR-4308Cl's SIGNAL GND terminal is meant to reduce noise when a record player is connected. This is not a safety ground terminal.

# **TV/CABLE Tuner**

Connect the cables to be used.

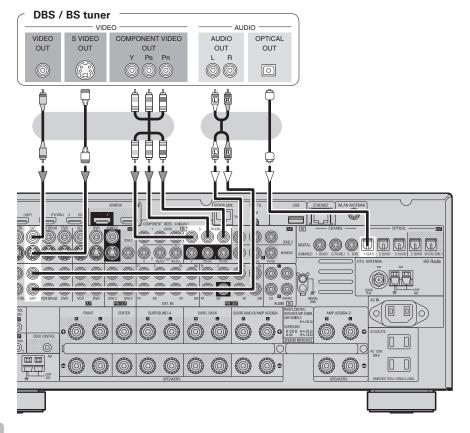

#### ø

When using an optical cable for the digital audio connection, make the settings at GUI menu "Source Select" - "TV/CBL" - "Assign" - "Digital" (127) page 42).

Satellite Receiver

Connect the cables to be used.

Ø

- When using a coaxial digital cable for the digital audio connection, make the settings at GUI menu "Source Select" "SAT" "Assign" "Digital" (127) page 42).
- When using a component video cable for the video connection, make the settings at GUI menu "Source Select" "SAT" "Assign" "Component" (127) page 42).

**Getting Started** 

Connections

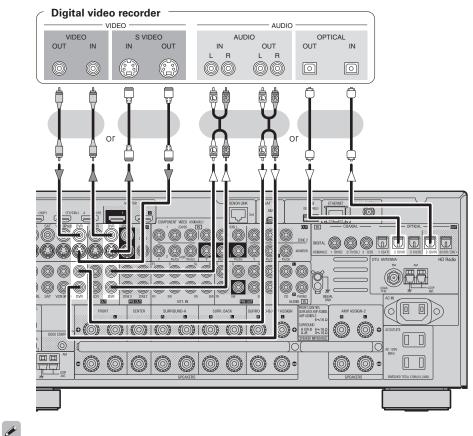

Setup Playback

# **Connecting the Recording Components**

Carefully check the left (L) and right (R) channels and the inputs and outputs, and be sure to interconnect correctly.

#### **Digital Video Recorder**

Connect the cables to be used.

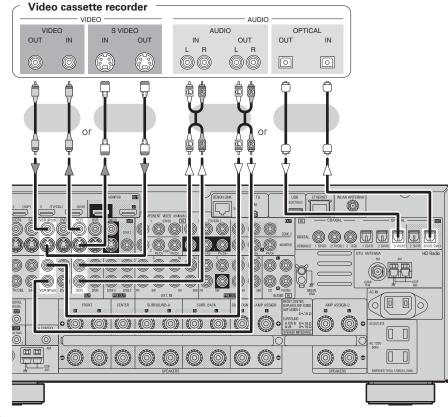

- Make analog connections if you wish to record analog audio signals.
- When recording to a digital video recorder, it is necessary that the type of cable used with the playback source equipment be the same type that is connected to the AVR-4308CI DVR OUT connector.
   Example: TV IN → S-Video cable : DVR OUT → S-Video cable
  - TV IN  $\rightarrow$  Video cable : DVR OUT  $\rightarrow$  Video cable
- When using a component video cable for the video connection, make the settings at GUI menu "Source Select" "DVR" "Assign" "Component" (127) page 42).

#### NOTE

Do not connect the output of the component connected to the AVR-4308CI's OPTICAL2 output connector to any input connector other than OPTICAL2.

# Video Cassette Recorder

Connect the cables to be used.

• When recording to a VCR, it is necessary that the type of cable used with the playback source equipment be the same type that is connected to the AVR-4308CI VCR OUT connector.

**Example:** TV IN  $\rightarrow$  S-Video cable : VCR OUT  $\rightarrow$  S-Video cable

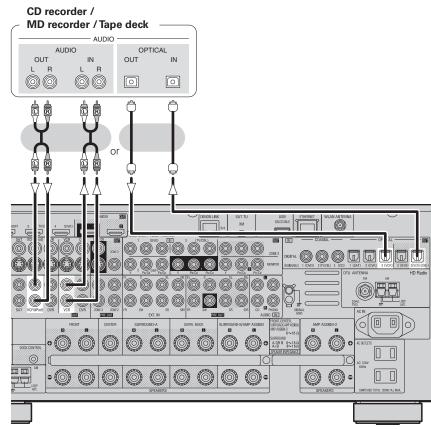

- TV IN  $\rightarrow$  Video cable : VCR OUT  $\rightarrow$  Video cable
- When using a component video cable for the video connection, make the settings at GUI menu "Source Select" "VCR" "Assign" "Component" (127) page 42).

#### NOTE

Do not connect the output of the component connected to the AVR-4308CI's OPTICAL3 output connector to any input connector other than OPTICAL3.

#### CD Recorder / MD Recorder / Tape Deck

Make analog connections if you wish to record analog audio signals, or digital connections if you wish to record digital audio signals, depending on the types of connectors on the components being used.

#### NOTE

Do not connect the output of the component connected to the AVR-4308CI's OPTICAL3 output connector to any input connector other than OPTICAL3.

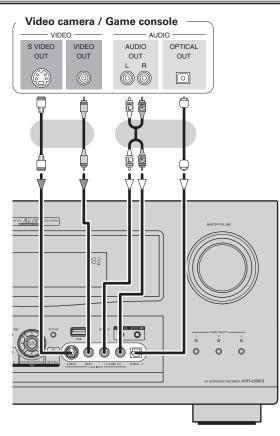

# **Connections to Other Devices**

Carefully check the left (L) and right (R) channels and the inputs and outputs, and be sure to interconnect correctly.

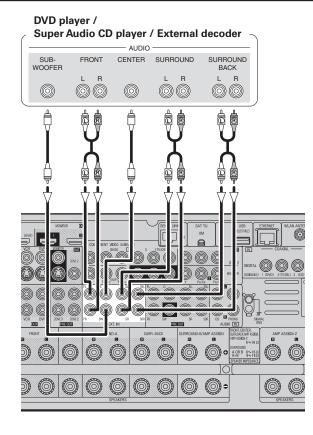

#### **Components Equipped with a DENON LINK connector** Multi-channel playback is possible with DVD-Audio discs, Super Audio CD, etc. **DVD** player DENON LINK f SAT TU XM WLAN ANTEP T ٥ AMP ASSIGN-2 $\bigcirc$ $(\bigcirc$ Õ 000 A OR B 6~160 $\bigcirc$ $\bigcirc$ $\bigcirc$ $\bigcirc$ (i) •

To use with DENON LINK connections, make the settings at GUI menu "Source Select" – "Assign" – "Digital" – "DENON LINK" (1) page 42).

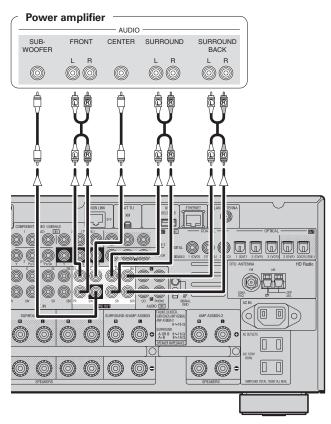

#### Video Camera / Game Console

# Component with Multi-channel Output connectors

#### **External Power Amplifier**

#### 6

When using just one surround back speaker, connect it to the left channel (SBL).

- To play the analog input signals input to the EXT. IN connectors, press the **INPUT MODE** button on the main unit or **INPUT** button on the main remote control unit and select "EXT. IN" or make the settings at GUI menu "Source Select" "(input source)" "Input Mode" "Input Mode" "EXT. IN" (12) page 41).
- The video signal can be connected in the same way as a DVD player (127 page 12).
- To play copyright-protected discs, connect the AVR-4308Cl's EXT. IN connector with the DVD player's analog multi-channel output connector.

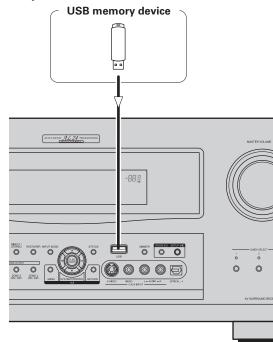

**Getting Started** 

Connections

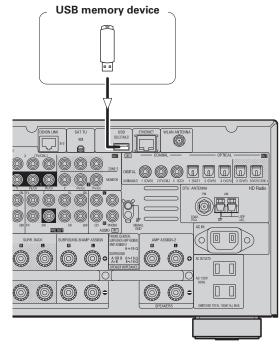

Setup

#### **USB** Port

#### Front panel

#### Rear panel

# 

- In the initial status, USB memory devices can be used by connecting them to the USB port on the front panel.
- To change the port to be used, see "USB Select" on page 42.
- For instructions on playing the files on a USB memory device, see page 58, 59.

#### NOTE

- Set to the USB port you want to use.
- The AVR-4308Cl is equipped with two USB ports, one each on the front and rear panels. It is not possible to use the set with USB memory devices connected to both the ports at the same time. Select the USB port you want to use at the "Source Select" "NET/USB" "Playback Mode" "USB Select" menu.
- Do not use the extension cable for connecting the USB memory deveice to the AVR-4308Cl's USB port. Use of the extension cable may cause harmful interference.

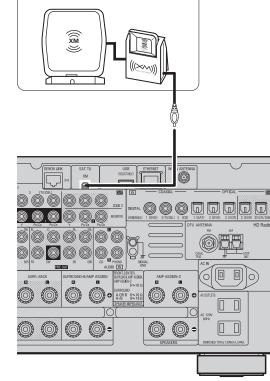

# XM Connector

- The AVR-4308CI is an XM Ready<sup>®</sup> receiver. You can receive XM<sup>®</sup> Satellite Radio by connecting to the XM Mini-Tuner and Home Dock (includes home antenna, each sold separately) and subscribing to the XM service.
- Plug the XM Mini-Tuner and Home Dock into the XM connector on the rear panel.
- Position the Home Dock antenna near a south-facing window to receive the best signal.

For details, see "Listening to XM Satellite Radio Programs" ( $\bigcirc$  page 51, 52).

When making connections, also refer to the operating instructions of the XM Mini-Tuner and Home Dock.

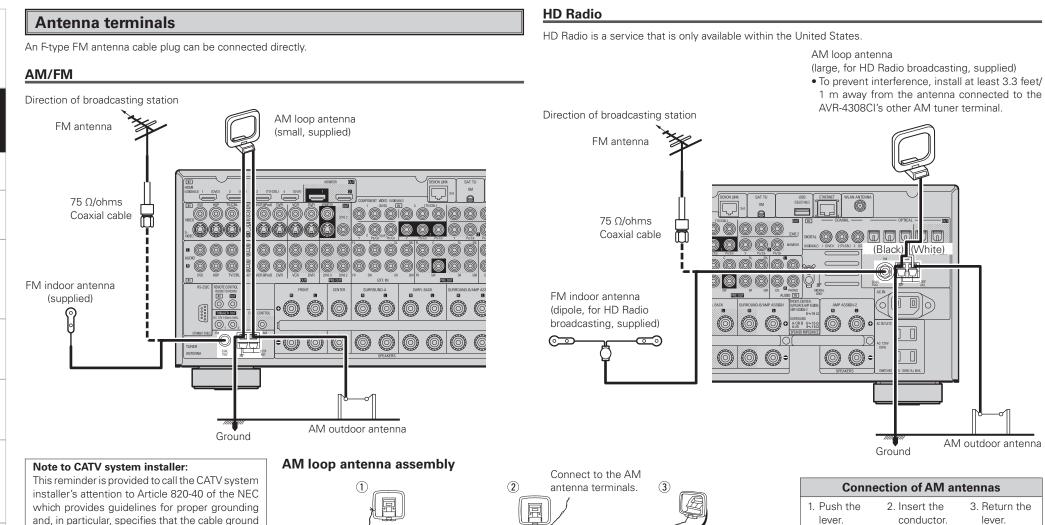

#### XM Mini-Tuner and Home Dock

#### NOTE

Keep the power cord unplugged until the XM Mini-Tuner and Home Dock connection have been completed.

- The XM name and related logo are registered trademarks of XM Satellite Radio Inc. All rights reserved.
- XM Ready is a registered trademark of XM Satellite Radio Inc. All rights reserved.

- Make sure the AM loop antenna lead terminals do not touch metal parts of the panel.

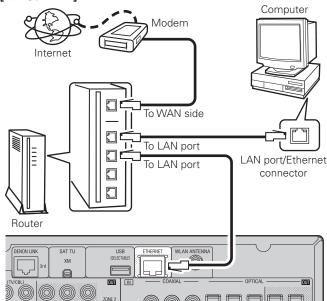

as practical.

shall be connected to the grounding system of

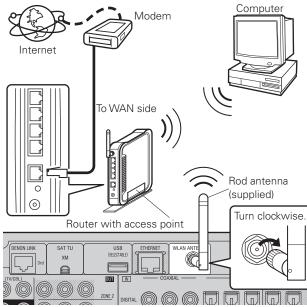

the building, as close to the point of cable entry

#### **Network Audio**

#### [Wired LAN]

#### [Wireless LAN]

#### **Required system**

#### □ Broadband Internet connection

A broadband line connection to the Internet is required in order to use the AVR-4308CI's Internet radio function and firmware update.

#### Modem

This is a device that is connected to the broadband line to communicate with the Internet. Some are integrated with the router.

#### Router

- When using the AVR-4308Cl, we recommend you use a router equipped with the following functions:
- Built-in DHCP (Dynamic Host Configuration Protocol) server This function automatically assigns IP addresses on the LAN.
   Built-in 100 BASE-TX switch

When connecting multiple devices, we recommend a switching hub with a speed of 100 Mbps or greater.

• When using with a wireless LAN, prepare a broadband router with built-in access point.

#### **Ethernet cable (CAT-5 or greater recommended)** Use for wired LAN.

- The AVR-4308CI does not come with an Ethernet cable.
- Some flat type Ethernet cables are easily affected by noise. We recommend using a normal type cable.
- If the sound is broken in an environment in which there is much power supply noise from electric products or in a noisy network environment, use a shielded type Ethernet cable.

#### Computer

A computer with the following specifications is required to use a music server:

- OS
- Windows® XP Service Pack2, Windows Vista
- Software (Prepare one of the following.)
- · .NET Framework 1.1 and Windows Media Connect (Windows XP)
- Windows Media Player ver.11
- $\cdot\,$  DLNA-compatible server software
- Internet browser

Microsoft Internet Explorer 5.01 or later

- LAN port
- 300 MB or more free disk space
- \* Free disk space is required to store music and video files. The following sizes are approximate.

Format	mat Bit rate Per minute		Per hour
	128 kbps	Approx. 1 MB	Approx. 60 MB
MP3 / WMA	192 kbps	Approx. 1.5 MB	Approx. 90 MB
MPEG-4 AAC 256 kbps		Approx. 2 MB	Approx. 120 MB
	392 kbps	Approx. 3 MB	Approx. 180 MB
WAV (LPCM)	1400 kbps	Approx. 10 MB	Approx. 600 MB
FLAC	1080 kbps	Approx. 7.7 MB	Approx. 464 MB

For connections to the Internet, contact an ISP (Internet Service Provider) or a computer shop.

#### NOTE

- A contract with an ISP is required to connect to the Internet. No additional contract is needed if you already have a broadband connection to the Internet.
- The types of routers that can be used depend on the ISP. Contact an ISP or a computer shop for details.
- Depending on the server, video files may be displayed, but they cannot be played on the AVR-4308Cl.

#### Others

- If you have an Internet provider contract for a line on which network settings are made manually, make the settings at GUI menu "Manual Setup" – "Network Setup" (27 page 32 ~ 35).
- With the AVR-4308CI, it is possible to use the DHCP and Auto IP functions to make the network settings automatically.
- When using a broadband router (DHCP function), the AVR-4308CI sets the IP address, etc., automatically.
- When using the AVR-4308Cl connected to a network with no DHCP function, make the settings for the IP address, etc., at GUI menu "Manual Setup" "Network Setup" (127) page 32 ~ 35).
- The AVR-4308Cl is not compatible with PPPoE. A PPPoE-compatible router is required if you have a contract for a line of the type with which the PPPoE is set.
- Depending on the ISP with which you have your contract, it may be necessary to make proxy server settings to use the Internet radio function. If you made proxy server settings on the computer to connect to the Internet, make the proxy server settings on the AVR-4308Cl in the same way.

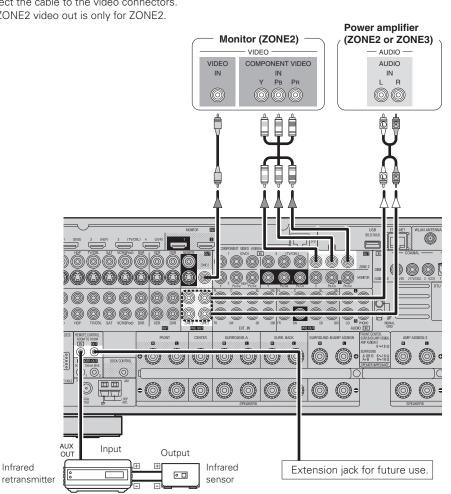

**Getting Started** 

Connections

#### **Multi Zone**

#### **ZONE2 or ZONE3 Pre-out Connections**

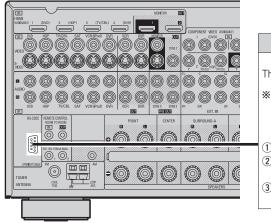

- If another power amplifier or pre-main (integrated) amplifier is connected, the ZONE2 or ZONE3 pre-out (variable or fixed level) connectors can be used to play a different program source in ZONE2 or ZONE3 the same time (P page 72 ~ 76).
- When using a component video cable to connect the AVR-4308Cl and input device, connect the ZONE2 monitor output to the component video connectors. When using an S-Video cable or a video cable, please connect the cable to the video connectors.
- The ZONE2 video out is only for ZONE2.

#### 

Infrared

- For the audio output, use high quality pin-plug cords so that no induction humming or noise is produced.
- For instructions on installing and operating separately sold devices, refer to the respective devices' operating instructions.
- To conduct multi-zone playback, see "Amp Assign / Multi-Zone Connections and Operations" (127 page 72 ~ 76).

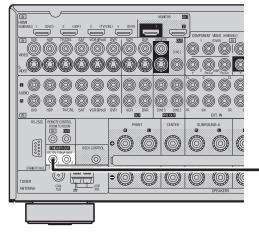

**External Controller** 

#### **RS-232C** connector

- This connector is used for an external controller.
- \* If you wish to control the AVR-4308CI from an external controller using the RS-232C connector, perform the operation below beforehand.
- 1) Turn on the AVR-4308CI's power.
- (2) Turn off the AVR-4308Cl's power from the external controller.
- ③ Check that the AVR-4308CI is in the standby mode.
- When using in combination with an RF Remote Controller (RC-7000CI, sold separately) or RF Remote Receiver (RC-7001RCI, sold separately) two-way communication with an RF Remote Controller is possible.

The AVR-4308CI's status information as well as iPod and Internet audio music files can be browsed watching the RF Remote Controller's display. For details, refer to the operating instructions of the respective devices.

• When used in combination with an RF Remote Controller or RF Remote Receiver, make the settings at GUI menu "Manual Setup" - "Option Setup" - "2Way Remote" - "Used" (127 page 38).

#### **Trigger output jacks**

The power of an external device equipped with a trigger input jack can be turned on and off in association with operations on the AVR-4308CI. For details, see GUI menu "Manual Setup" -"Option Setup" - "Trigger Out 1" or "Trigger Out 2" (🖙 page 38).

- Output level: 150 mA/12 V
- Check the trigger input conditions of the connected device.
- If the trigger input level of the connected device is higher than 150 mA/12 V and depending on the short-circuiting conditions, the AVR-4308CI's protection circuit may be activated, in which case "TRIGGER PROTECT" appears on the display. If this happens, turn off the AVR-4308Cl's power and disconnect the connected device

Getting Started

G,

2

- Audvssev MultEQ<sup>®</sup> XT automatically measures the acoustical problems in the listening environment to create the best audio experience for your home theater.
- It optimizes a large listening area where one or more listeners are seated.

Measurements are performed by placing the calibrated microphone (DM-A505Z) successively at multiple positions throughout the listening area as shown in **Example** (1). For best results, it is strongly recommended to measure 6 or more positions so that the measurements have the proper spatial weighting.

Even if the listening environment is small as shown in **Example** 2, measuring at multiple points throughout the listening environment results in more effective correction.

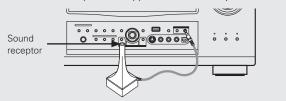

#### About the main listening position (\*M)

The main listening position refers to the most central position where one would normally sit within the listening environment. MultEQ XT uses the measurements from this position to calculate speaker distance, level, polarity, and the optimum crossover value for the subwoofer.

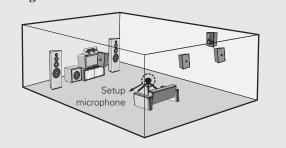

To make manual adjustments to the settings, see pages 28 ~ 30.

# **Preparations**

**4** Connect the included calibrated setup microphone to the **SETUP MIC** jack on the main unit. The auto setup screen appears automatically.

A Place the microphone at ear height on a tripod or stand **Z** with the microphone pointing directly up towards the ceiling.

\* It is not recommended to hold it in your hand. Be sure that the path from microphone to the speakers is not blocked by objects. Avoid placing the microphone close to a seat back or wall as sound reflections may give inaccurate results.

When using a subwoofer, make the following settings before starting the auto setup procedure:

- Defeat the volume and crossover controls if possible
- If this is not possible then set
- Volume: "12 o'clock" position
- Crossover frequency: "Maximum/Highest Frequency"
- · Low pass filter: "Off"
- · Standby mode: "Off"

- Do not disconnect the setup microphone until the auto setup procedure is completed.
- When using headphones, unplug the headphones before starting the auto setup procedure.

Multi-Zone

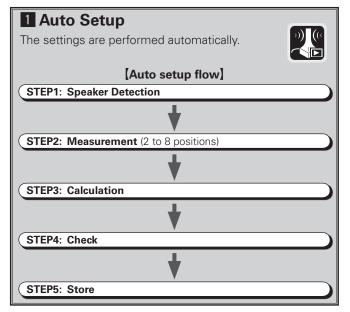

( )

# **Auto Setup**

Optimize settings for speakers in use.

#### Menu tree

Auto Se	tup
	Auto Setup
2	Option
3	Parameter

#### Start

#### Start Auto Setup.

The Audyssey MultEQ XT Auto Setup process automatically calculates the size, level, distance, bass management crossover frequency, and optimal settings for each speaker and subwoofer. Audyssey MultEQ XT corrects acoustical distortions within the listening area.

Before starting, connect and position all your speakers.

Once started, MultEQ XT will play a series of test tones through each speaker.

#### 6

If an error message appears during the measurements, check "Error Messages" (27) page 27), take the advised action, then start the measurements again.

#### Configuration

The speaker system to be measured can be selected ahead of time here.

#### [Selectable items] 7.1 (B) 7.1 5.1

# 

GUI

)))((( ))))(()

> Setting the correct speaker configuration can reduce the time required to measure during the auto setup procedure as the system will not have to look for speakers that are not connected.

#### Amp Assign

Advanced setting : changes power amplifier assignment.

#### NOTE

The items selectable at "Config." differ according to the "Amp Assign" settings.

#### STEP1 : Speaker Detection

The speaker connection and polarity are detected at the first measurement position. The following attributes are also determined at this time: "Speaker Size," "Speaker Distance," "Channel Level," "Crossover Frequency."

Once the measurements are completed, the results are displayed.

#### NOTE

- Loud test tone may be played during Audyssey MultEQ XT Automatic Speaker Setup. This is part of normal operation. If there is background noise in room, these test tones will increase in volume.
- Do not stand between the speakers and setup microphone or allow obstacles in the path while the measurements are being made. This will cause inaccurate readings.
- Quiet the listening environment before beginning measurements and refrain from talking. Turn off air conditioning units or other devices that emit noise if at all possible as measurements may be affected by these sounds.
- Operating the MASTER VOLUME knob on the main unit or the VOL +/- buttons on the remote control unit during the measurements will cancel the measurements.
- Do not change the speaker connections or subwoofer volume after "STEP1".

#### STEP2: Measurement

After completing a measurement position, move the microphone to the next position.

# 6

Measure at least 6 positions (main listening position and at least 5 other surrounding positions). For best results it is recommend measuring **6** or more positions (with a maximum of 8 positions).

#### STEP3: Calculation

When "Calculate" is selected at "STEP2", the measurements taken are analyzed automatically to determine how the speaker system interacts with the room.

¢

The time required for this analysis depends on the number of speakers connected. The higher the number of speakers, the longer the time required for analysis.

#### STEP4: Check

Once the auto setup procedure is complete, a measuring result check screen appears.

Select any item whose results you want to check to review the results.

Values that are different from the actual distance may be set for speakers with built-in filters (subwoofers, etc.). This is because filters add electrical delay to the signal that should be compensated.

#### STEP5: Store

The auto setup measurement results are stored in the AVR-4308CI.

#### NOTE

Do not turn the power off while the settings are being stored.

**Getting Started** 

Connections

Setup

#### **Error Messages**

If the auto setup procedure could not be completed due to speaker installation, the measuring environment, etc., an error message is displayed. If this happens, check the relevant items, be sure to take the necessary measures, then perform the auto setup procedure over again.

Error messages (examples)	Cause	Measures

- 6 Surround Speaker

# **1** Speaker Configuration

Select speaker configuration and size. (bass reproduction capability)

#### Front

Select front speaker size.

[Selectable items] Large Small

#### Center

Select center speaker use and size.

[Selectable items] Large Small None

#### Subwoofer

Select subwoofer use.

[Selectable items] Yes No

#### Surround A

GUI

GUI

0

Select surround speakers A use and size.

[Selectable items] Large Small None

#### Surround B

Select surround speakers B use and size.

#### [Selectable items] Large Small None

#### Surround Back

Select surround back speaker use and size.

[Selectable items]	Large	Small	None
	2spkrs	1spkr	

- Large :Select this for a large speaker with strong bass reproduction.
- **Small** :Select this for a smaller speaker with weaker bass reproduction.
- Select "Large" or "Small" not according to the physical size of the speaker but according to the low frequency reproduction capabilities based on the frequency set at "Crossover Frequency" (ICP page 29).
- When "Front" is set to "Small", "Subwoofer" is automatically set to "Yes".
- If "Subwoofer" is set to "No", "Front" is automatically set to "Large".
- If "Surround A" is set to "None", "Surround B" and "Surround Back" are automatically set to "None".
- When using just one surround back speaker, connect it to the left channel (SBL).

#### 2 Subwoofer Mode

Select low range signal to be reproduced by subwoofer.

#### [Selectable items] LFE LFE+Main

ø

*6* 

- This can be set when GUI menu "Speaker Configuration" "Subwoofer" is set to "Yes".
- Play music or a movie source and select the mode offering the strongest bass.
- Select "LFE+Main" if you want the bass signals to always be produced from the subwoofer.

#### **3** Distance

Set distance from listening position to speakers. Before making the settings, measure the distance from the listening position to the different speakers.

#### Feet / Meters

Select unit for distance.

#### Step

Select step. (smallest distance)

#### [Selectable items]

1ft	0.1ft	: Can be selected when "Feet" is set.
0.1m	0.01m	: Can be selected when "Meters" is set.

#### Default

Resets the settings to the default values.

#### **Distance measurement**

Select the speaker you want to set, then set the distance. Set the value closest to the measured distance.

#### [Variable range]

- 0.0ft ~ 60.0ft : Display when "Feet" is set.
- 0.00m ~ 18.00m : Display when "Meters" is set.

#### NOTE

Set the distance between the listening position and the various speakers to no more than 20.0 ft (6.00 meters).

Getting Sta

#### 4 Channel Level

Adjust channel levels to obtain equal volume from all speakers.

#### Mode

**Getting Started** 

Connections

Setup

Select test tone playback method.				
[Selectable items]	Auto	Manua	al	
Surround				
Select surround speake	er from v	vhich tes	t tone is output.	
[Selectable items]	Α	В	A+B	
Start				
Output test tone.				
[Variable range]	-12dB	~ OdE	8 ~ +12dB	

#### Default

Resets the settings to the default values.

#### R Operating from the main remote control unit

Adjusting with the main remote control unit using the test tones is only possible in the "Auto" mode and only effective in the STANDARD (Dolby / DTS Surround) mode. The adjusted levels for the different modes are automatically stored in the memory.

#### [Adjusting using test tones]

① Press the **TEST** button.

Test tones are output from the various speakers.

- (2) Use the  $\triangleleft \triangleright$  button to adjust so that the volume is equal for all speakers.
- (3) When the adjustments are completed, press the **TEST** button again.

# 

- When the GUI menu "Speaker Configuration" "Surround Back" setting (Ppage 28) is set to "1spkr", the surround back speaker display is set to "Surround Back".
- Speakers set to "None" in the "Speaker Configuration" settings are not displayed.
- "Surround" can be set when GUI menu "Speaker Configuration" "Surround A" or "Surround B" is set to "Large" or "Small" (12) page 28).
- When using surround speakers, be sure to adjust the volume of the different speakers.
- When "Channel Level" is adjusted, the adjusted values are set for all the surround modes. To adjust the channel level separately for the different surround modes, use the operation see page 62.

# **5** Crossover Frequency

Select crossover frequency from which subwoofer handles low range signal.

#### [Selectable items]

40Hz	60Hz	80Hz	90Hz	100Hz	110Hz
120Hz	150Hz	200Hz	250Hz		

Only the portion of the bass sound of the various speakers output from the subwoofer that has a frequency below the frequency set here is output.

Set this according to the low frequency reproduction capabilities of the speakers you are using.

#### Advanced

Set the crossover frequency separately for the different speakers.

**~** 

- The "Crossover Frequency" can be set when there are speakers that have been set to "Small" at GUI menu "Speaker Setup" – "Speaker Configuration" or when "Subwoofer" is set to "Yes" (127) page 28).
- If in the "Advanced" settings, GUI menu "Subwoofer Mode" is set to "LFE", it is possible to make this setting for speakers set to "Small" at "Speaker Configuration". If set to "LFE+Main", this setting can be made regardless of the speaker size.
- For speakers set to "Small", sound below the crossover frequency is cut from the sound output. The cut bass sound is output from the subwoofer or front speakers.
- Always set the crossover frequency to "80 Hz". When using small speakers, however, we recommend setting the crossover frequency to a higher frequency.

## **6** Surround Speaker

Select surround speakers to use for each surround mode.

[Selectable items]

<u>\_</u>

**Operating from the main remote control unit** Press the **SPKR** button.

• This can be set when GUI menu "Speaker Configuration" - "Surround A" and "Surround B" are used (127) page 28).

- $\bullet$  When using the pre-out connectors, select and use either "Surround A" or "Surround B".
- Make the surround speaker settings when the input mode is set to "EXT. IN" at GUI menu "Manual Setup" "Audio Setup" "EXT. IN Setup" (@ page 31).

#### About Speaker Type Setting when Using Both Surround speakers A and B

If "Small" is set for either surround speakers A or B, the output is the same as when "Small" is set for both A and B.

HDMI Setup Make settings for HDMI video/audio output.	<b>3 Progressive Mode</b> Select optimum progressive mode for video material.	<b>Auto Lip Sync</b> Automatic compensation for timing shift in audio and video output.

# 5 Manual EQ

Adjust tonal quality for each speaker using graphic equalizer.

#### Adjust CH

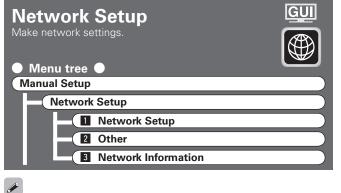

# 

"Curve Copy" is displayed after the auto setup procedure has been performed.

#### Default

Resets the settings to the default values.

- If you are using a broadband router (DHCP function), there is no need to make the settings at "Setting the IP Address" and "Setting the Proxy", since the DHCP function is set to "ON" in the AVR-4308Cl's default settings.
- If the AVR-4308Cl is being used connected to a network without the DHCP function, the network settings must be made. In this case, some knowledge of networks is required. For details, consult a network administrator.
- If you cannot connect to the Internet, recheck the connections and settings (127 page 20).
- If you do not understand about Internet connection, contact your ISP (Internet Service Provider) or the store from which you purchased your computer.

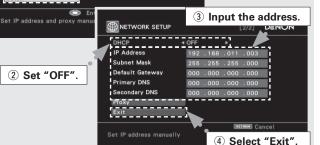

#### • DHCP (Dynamic Host Configuration Protocol) :

These are systems by which the IP address and other network settings are automatically set for the AVR-4308Cl, computer, broadband router and network devices.

• DNS (Domain Name System) :

This is a system for converting the domain names used when browsing Internet sites (for example, "www.denon.jp") into the IP addresses actually used for communications (for example, "202.221.192.106").

**1** Network Setup Make settings for wired or wireless LAN. Wired LAN settings Use this procedure to configure the Wired LAN settings. Connect the LAN cable ( page 20). **2** Turn on the AVR-4308CI (Page 49). AVR-4308CI performs automatic network setup due to the DHCP function. When connecting to a network that has no DHCP function, perform the setting in step 3. ▲ Set the IP address at the GUI menu "Manual Setup" **5** "Network Setup" – "Network Setup". RETWORK SETUP DENON DHCP ON 192.168.11.3 IP Address 1) Select "Detail". 💿 E ③ Input the address. Set IP address and proxy man RETWORK SETUP P Address

- ① Select "Detail" and press the ENTER button.

Connections

③ Use the △▽ ▷ button to input the address and press the ENTER button.

#### IP Address

Set the IP address within the ranges shown below. The Network Audio function cannot be used if other IP addresses are set. CLASS A: 10.0.0 ~ 10.255.255.255 CLASS B: 172.16.0.0 ~ 172.31.255.255 CLASS C: 192.168.0.0 ~ 192.168.255.255

#### Subnet Mask 🗄

When connecting an xDSL modem or terminal adapter directly to the AVR-4308CI, input the subnet mask indicated in the documentation supplied by your provider. Normally input 255.255.255.0.

#### Default Gateway

When connected to a gateway (router), input its IP address.

#### Primary DNS Secondary DNS

If there is only one DNS address indicated in the documentation supplied by your provider, input it at "Primary DNS". If there are two or more DNS addresses, input the first one at "Secondary DNS".

- ④ Use the 
   button to select "Exit" and press the ENTER button. Setup is complete.
- When connecting to the network via a Proxy server, select "Proxy" and press the ENTER button (☞ page 35 "Proxy settings").

#### Wireless LAN settings

Use this procedure to configure the Wireless LAN settings.

#### Fitting a rod antenna (P page 20).

\* If a LAN cable is connected, remove it.

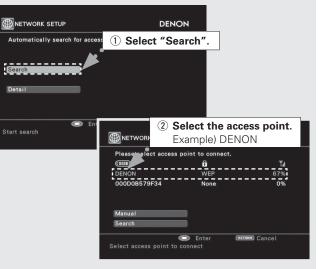

# **2** Turn on the AVR-4308CI (1) page 49).

# **3** Set the access point at the GUI menu "Manual Setup" – "Network Setup" – "Network Setup".

When searching access points to connect automatically, refer to "Automatic settings".

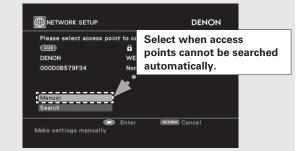

When searching access points to connect manually, refer to "Manual settings".

#### **Automatic settings**

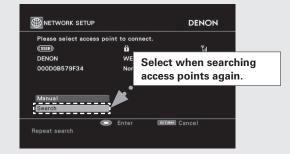

- ① Select "Search" and press the **ENTER** button. The access point you have set is displayed.
- (2) Use the  $\Delta \nabla$  button to select the access point, and then press the **ENTER** button.

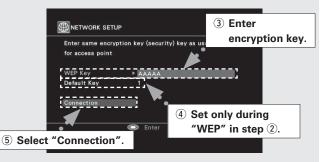

※If the access points are not detected automatically, use the button to select the "Manual" and press the **ENTER** button. Setting becomes manual. For details, see "Manual settings" (I page 34, 35).

 $\mbox{ %}$  If the access points are repeat search, use the  $\nabla$  button to select the "Search" and press the  $\mbox{ ENTER}$  button.

③ If there is an encryption setting for the access point you selected in step ②, enter same encryption key as used for the access point. (If there is no encryption setting, proceed to step ⑤.

Use the  $\Delta \nabla \triangleleft \triangleright$  button to input the "Key" (encryption key) and press the ENTER button.

Enter the same encryption key as used for the access point.

#### [Characters that can be input]

#### A~Z a~z 0~9 ! " # % & '() \* +, -./:; <=>?@[\](space)

When no security settings have been used in the Internet connection settings, this step is not necessary.

④ When encryption is by "WEP", select the "Default Key" using the  $\nabla$  button, and then press the  $\triangleleft \triangleright$  button.

[Selectable items] 1 2 3 4

Select the same default key as used for the access point. This should normally be set to "1".

(5) Use the  $\nabla$  button to select "Connection" and press the **ENTER** button.

Network connection starts.

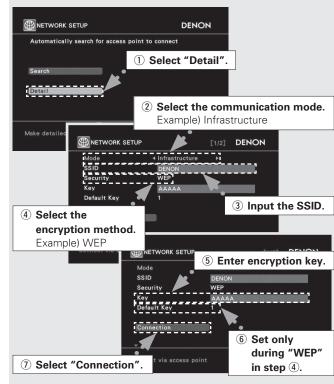

When connection is established with the access point, "Connection completed." is displayed.

AVR-4308CI performs automatic network setup due to the DHCP function.

When connecting to a network that has no DHCP function, perform the setting in step 4.

#### □ Manual settings

#### (1) Select "Detail" and press the **ENTER** button.

(2) Use the  $\triangleleft \triangleright$  button to select the Mode and press the  $\nabla$ button.

#### [Selectable items]

- **Infrastructure** : Select when communication is via an access point.
  - Ad-hoc : Select during direct communication, when an access point is not used.
- (3) Use the  $\Delta \nabla \triangleleft \triangleright$  button to input the name of the wireless network (SSID) and press the ENTER button.

- Associated with respect to surround modes that are set to "ON".
- This can be set if the "MAIN ZONE" setting at "Setting with Respect to the Zone" is set to "ON".
- Associated when an input source for which "Setting with Respect to the Input Source" is set to "ON" is selected.

### Setting with Respect to the Monitor

- When the HDMI monitor set to on is selected, the trigger out turns on.
- Associated with respect to HDMI monitor that are set to "ON".
- This can be set if the "MAIN ZONE" setting at "Setting with Respect to the Zone" is set to "ON".
- Associated when an input source for which "Setting with Respect to the Input Source" is set to "ON" is selected.

### 8 Digital Out

Set usage of OPT3 OUT.

### [Selectable items] ZONE4 Select Rec Select

### NOTE

The ZONE4 operations cannot be performed when set to "Rec Select".

### 9 Remote ID

Set remote control ID. Match the ID setting of the remote control unit and the receiver.

### [Selectable items] 1 2 3 4

# • When changing the remote ID, also change the "AMP", "iPod", "TU" and NET/DTU modes of the main remote control unit at the same time (1277 page 67).

• When changing the remote ID, also change the sub remote control unit at the same time (12) page 72).

### 10 2Way Remote

Make setting for 2-way remote control unit.

### [Selectable items] Used Not Used

When using a 2-way remote control unit (RC-7000Cl and RC-7001RCl, sold separately), set this to "Used".

### 11 Dimmer

Adjust display brightness of the receiver.

Press the **DIMMER** button.

### 12 Setup Lock

Protect settings from inadvertent change.

- When "Setup Lock" is set to "ON", the settings listed below can no longer be changed. Also, "SETUP LOCKED!" is displayed if you attempt to operate related buttons.
  - · GUI menu operations
  - · RESTORER
  - Night Mode
  - · Parameter
  - · Room EQ
  - · Channel Level
  - · Audio Delay
- To cancel the setting, press the **MENU** button to re-display the "Setup Lock" screen, then change the setting to "OFF".

### 13 Maintenance Mode

This sets the function for maintenance by a DENON serviceperson or installer. (For professional use only.)

This function allows a DENON serviceperson or installer to check the AVR-4308Cl's status and make settings via the Internet.

### NOTE

Only use this function if so instructed by a DENON serviceperson or installer.

### 14 Firmware Update

Update the firmware of the receiver.

### Check for Update

You can check for fi rmware updates. You can also check approximately how long it will take to complete an update.

#### Start

Execute the update process.

When updating starts, the power indicator becomes red and the GUI screen is shut down. The amount of update time which has elapsed is displayed.

When updating is complete the power indicator becomes green and normal status is resumed.

% If the display reads as shown below, check the settings and network environment, then update again.

Display	Description
Updating failed	Updating failed.
Login failed	Failure to log into server.
Server is busy	Server is busy. Wait a while then try again.
Connection fail	Failure connecting to server.

### **15** Add New Feature

Display the new functions (payment required) which can be purchased for downloading to the AVR-4308Cl and upgrade.

When you purchase a new function and register your user information, "Registered" is displayed on this menu and you can proceed with the upgrade.

🖋 When "N

When "Not Registered" is displayed on the Add New Feature screen, you cannot upgrade.

To use the upgrade function, you should purchase an upgrade package from the DENON website.

To purchase the package, you will need the ID number shown on this screen.

To display the ID number on the screen, hold the <D> and <STATUS> buttons down for 3 seconds or more.

### Upgrade

#### Execute the upgrade process.

When updating starts, the power indicator becomes red and the GUI screen is shut down. The amount of update time which has elapsed is displayed.

When updating is complete the power indicator becomes green and normal status is resumed.

% If the upgrade is not successful, an error message identical to those in "Firmware Update" will appear on the display, check the settings and network environment, then update again.

#### Upgrade Status

A list of the additional functions provided by the Upgrade will be displayed.

# Notes concerning use of "Firmware Update" and "Add New Feature"

- In order to use these functions, you must have the correct system requirements and settings for a broadband Internet connection.
- Do not turn off the power until updating or upgrating is completed.
- Even with a broadband connection to the Internet, approximately 1 hour is required for the updating/upgrading procedure to be completed.

Once updating/upgrade starts, normal operations on the AVR-4308Cl cannot be performed until updating/upgrading is completed. Furthermore, updating/upgrading the firmware may reset the

backup data for the parameters, etc., set for the AVR-4308CI.

Information regarding the "Firmware Update" function and "Add New Feature" will be announced on the DENON web site each time related plans are defined.

# **Surround Modes**

## **Standard Playback**

This is the standard mode for enjoying surround sound according to the program source.

### **Surround Playback of 2-channel Sources**

To select these surround modes using the buttons on the main unit and main remote control unit, press the STANDARD button. The mode switches each time the button is pressed.

• When using a surround back speaker

[Selectable items]		DOLBY P	L∏x	DTS NEO:6	neural

- When not using a surround back speaker
- [Selectable items] DOLBY PLII DTS NE0:6 neural
  - **DOLBY PLIIx** :The signals are decoded in DOLBY PLIIx or or **DOLBY PLI** DOLBY PLII for playback.
  - Cinema : This mode is suited for movie sources.
    - : This mode is suited for music sources. Music
      - : This mode is suited for games. Game
    - **Pro Logic** : This is the Pro Logic playback mode. This can be selected when playing with a DOLBY PLII decoder. When this mode is selected, "DOLBY PL" is displayed.
  - DTS NEO:6 :The signals are decoded in DTS NEO:6 for plavback.
    - Cinema : This mode is suited for movie sources.
    - Music : This mode is suited for music sources.
  - neural It is possible to play analog input signals and PCM (2-channel, 48kHz or less) in the surround mode.

This is the optimum mode for playing sources recorded in XM HD Surround (r page 79).

Select the "Cinema," "Music," "Game" and "Pro Logic" modes at GUI menu "Parameter" - "Audio" - "Surround Parameters" - "Mode" (Cr page 44).

### **Playing Multi-channel Sources** (Dolby Digital, DTS, etc.)

### [Selectable items]

### **STANDARD**

This mode is for decoding the input signals according to their format and plaving surround sound.

The display when the STANDARD mode is selected depends on the input signal and surround back output playback mode.

Inp	out signal	Display

DVD- Audio, SACD	Audio PCM (multi ch) / DSD (multi ch)	DTS-HD MSTR MULTI CH IN MULTI IN+PLIIx CINEMA MULTI IN+PLIIx MUSIC MULTI CH IN 7.1

- \*1: This is displayed when the input signal is "DTS-ES Matrix 6.1" and the AVR-4308CI's "AFDM" setting is set to "ON".
- \*2: This is displayed when the input signal is "DTS-ES Discrete 6.1"
- \*3 : This is displayed when the input signal is "DTS 96/24".

For details, see page 82.

### **DSP Simulation Playback**

The desired mode according to the program source and viewing situation can be selected from among 10 DENON original surround modes.

The surround parameters can be adjusted (1277 page 80, 81) to achieve an even more realistic, powerful sound field.

#### [Selectable items]

7CH STEREO	: This mode is for enjoying stereo sound from all speakers.		
WIDE SCREEN	: This mode is for enjoying the atmosphere of viewing a movie on a large screen.		
SUPER STADIUM	: This mode is suited for viewing sports programs.		
ROCK ARENA	: This mode is for enjoying the atmosphere of a live concert in an arena.		
JAZZ CLUB	: This mode is for enjoying the atmosphere of a live concert in a jazz club.		
	: This mode is for appreciating classical concert programs.		
MONO MOVIE *	: This mode is for playing monaural movie sources with surround sound.		
VIDEO GAME	: This mode is suited for achieving surround sound with video games.		
MATRIX	: This mode lets you add a sense of expansion to stereo music sources.		
VIRTUAL	: This mode is for enjoying surround effects		
<ul> <li>using only the front speakers or headphones.</li> <li>* When playing sources recorded in monaural in the MONO MOVIE mode, the sound will be off balance with a single channel (left or right), so input to both channels.</li> </ul>			

- To select these surround modes using the buttons on the main unit or main remote control unit, press the [SIMULATION] button. The mode switches each time the button is pressed.
- Depending on the program source being played, it may not be possible to achieve a satisfactory surround effect. In this case, try other modes to achieve a sound field suited to your tastes.

### **Stereo Playback**

#### [Selectable items]

#### STEREO

This is the mode for playing in stereo. The tone can be adjusted. Sound is output from the front left and right speakers and subwoofer.

## **Direct Playback**

### [Selectable items]

### DIRECT

In this mode the signals bypass the tone control circuitry for high quality sound.

The sound is output to the same channels as the input signal.

The display when the DIRECT mode is selected depends on the input signal.

For multi-channel sources, the display depends on the surround back output's play mode.

Input signal	Display		
Analog signal /			
PCM (2ch) /			
Dolby Digital source /	DIRECT		
DTS source /			
Other 2-channel digital signals			
DSD (2ch)	DSD DIRECT (*)		
	MULTI CH DIRECT		
PCM (multi ch)	M DIRECT + PLIIX CINEMA		
	M DIRECT + PLIIX MUSIC		
	M DIRECT 7.1		
DSD (multi ch)	DSD MULTI DIRECT (*)		

\* : When DSD signals are converted to PCM signals as set by the audio parameters and speaker settings, "DIRECT" or "MULTI CH DIRECT" is displayed.

For details, see page 83.

### **Playback in the Pure Direct Mode**

This is the mode that recreates the original sound most faithfully, providing extremely high quality sound.

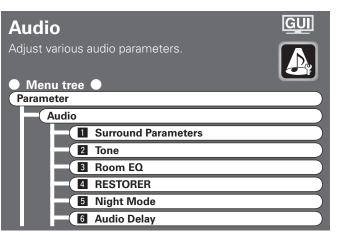

### Press the PURE DIRECT button.

A

- When in the PURE DIRECT mode, the GUI screen is not displayed and the display on the main unit is turned off.
- If the HDMI input connector is selected, video outputs are output in the PURE DIRECT mode.
- The channel level and surround parameters in the PURE DIRECT mode are the same as in the DIRECT mode.

### **1** Surround Parameters

Adjust surround sound parameters. The adjustable parameters differ for the different surround modes (127 page 80, 81).

#### Mode

Select the mode according to the playback source.

#### [Selectable items]

In the PLIIx or PLII mode: Cinema Music Game Pro Logic In the DTS NEO:6 mode: Cinema Music

\*: Can be selected in the PLII mode.

The "Music" mode is also effective for movie sources including a lot of stereo music.

- \*2: This can be selected when "Surround Back" is set to "2spkrs" or "1spkr" at the GUI menu "Manual Setup" - "Speaker Setup" -"Speaker Configuration" setting.
- \*3: This can be selected when plaving DTS sources.
- \*4: This can be selected when playing DTS sources including a discrete 6.1-channel signal identification signal.

### ( )

When using the surround back speaker, you can change the "SB CH Out" setting by pressing the STANDARD button.

#### SB CH Out (for 2-channel sources)

Determine whether to use surround back speakers.

[Selectable items] ON OFF

#### Subwoofer Att.

Attenuate subwoofer level when using EXT. IN mode.

[Selectable items] ON OFF

### ø

Set this to "ON" if the subwoofer channel level seems too high when playing Super Audio CD.

#### Subwoofer

Turn subwoofer output on and off.

[Selectable items] ON OFF

#### Default

Resets the settings to the default values.

### 2 Tone

Adjust the tonal quality of the sound.

#### Tone Defeat

Turn tone adjustments off.

[Selectable items] ON OFF

The tone cannot be adjusted when in the DIRECT mode.

#### **Bass**

Adjust low frequency range (bass).

[Variable range] –6dB ~ +6dB

#### Treble

Adjust high frequency range (treble) .

[Variable range] –6dB ~ +6dB

"Bass" and "Treble" can be set when "Tone Defeat" is set to "OFF".

### **3 Room EQ**

Select room equalizer for current environment.

#### [Selectable items]

Audyssey	: Optimize frequency response of all speakers.			
Audyssey Byp. L/R	: Optimize frequency response of speakers except front L and R speakers.			
Audyssey Flat	Optimize frequency response of all speakers to flat response.			
Manual	:Apply frequency response set with "Manual EQ" (@ page 32).			
OFF	: Turn equalizer off.			

# Operating from the main unit or main remote control unit

Press the R00M EQ button on the main unit or the EQ button on the main remote control.

→ OFF → Audyssey → Audyssey Byp. L/R → Manual ← Audyssey Flat ←

When "Audyssey" is selected, "MUDYSSEY " lights.

When "Audyssey Byp. L/R" or "Audyssey Flat" is selected, or when the auto setup measuring results have changed, "AUDYSSEY" lights.

### 6

- "Audyssey", "Audyssey Byp. L/R" and "Audyssey Flat" can be selected after the auto setup procedure has been performed.
- If the settings of the speakers for which "None" has been determined at "Auto Setup" are changed, "Audyssey", "Audyssey Byp. L/R" and "Audyssey Flat" cannot be selected and measurements have to be taken again to include the newly-added speakers.
- When using headphones, "Room EQ" is always set to "OFF".

### **4** RESTORER

This function restores compressed audio signals to how they were before compression and corrects the sense of volume of the bass and treble to obtain richer playback sound.

### [Selectable items]

#### OFF

Mode1 (RESTORER 64)

Mode2 (RESTORER 96)

#### Mode3 (RESTORER HQ)

The default setting for "NET/USB" and "iPod" is "Mode3". All others are set to "OFF".

# Operating from the main unit or main remote control unit

During playback, press the **RESTORER** button on the main unit or the **RSTR** button on the main remote control unit.

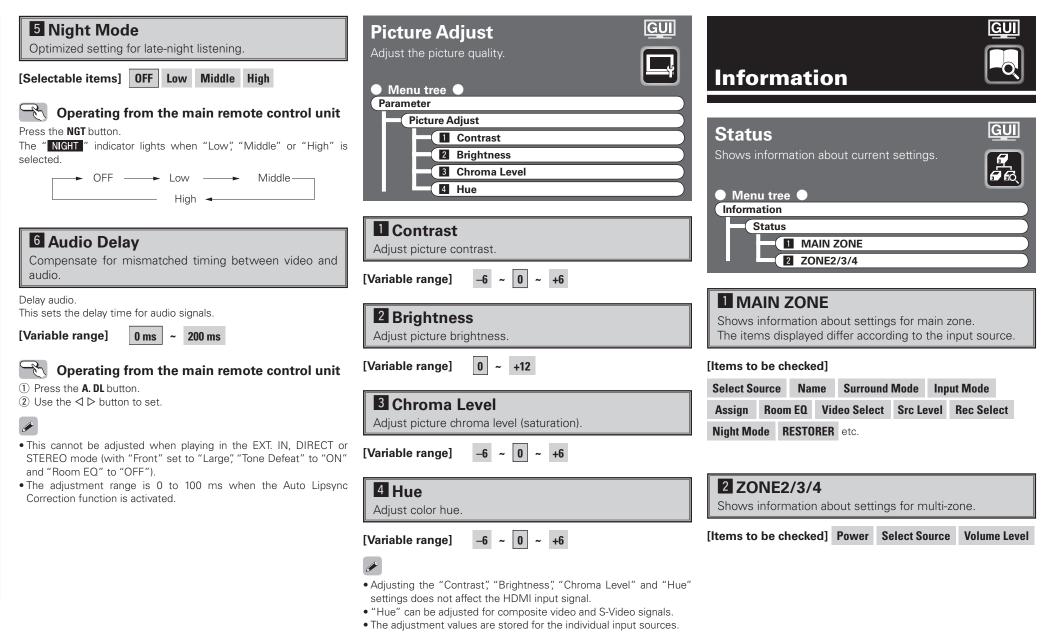

When set to something other than "OFF," "**RESTORER**" is displayed.

#### About the RESTORER function

- Such compressed audio formats as MP3, WMA (Windows Media Audio) and MPEG-4 AAC reduce the amount of data by eliminating signal components that are hard for the human ear to hear. The RESTORER function generates the signals eliminated upon compression, restoring the sound to conditions near those of the original sound before compression. It also corrects the sense of volume of the bass to obtain richer sound with compressed audio signals.
- This is displayed on the GUI menu and can be set when the input source is set to "XM", "HD Radio" or "NET/USB", or when analog signals (including AM/FM signals) or PCM signals (fs = 44.1/48 kHz) are input.

## Playback

### **Preparations**

### **Turning the Power On**

### Press <**POWER**>.

The power indicator lights red and the power is set to the standby mode.

### ▲ Press <0N/STANDBY> or [POWER ON].

**C** The power indicator flashes green and the power turns on.

To operate the AVR-4308CI using the main remote control unit, set the remote control unit to the AMP mode (r page 64 "Remote Control Unit Operations").

### **Turning the Power Off**

(1) Press <ON/STANDBY> or [POWER OFF].

The power is set to the standby mode.

(2) Press <POWER>.

The power indicator turns off, and so does the power.

### 

Power continues to be supplied to some of the circuitry even when the power is in the standby mode. When leaving home for long periods of time or when traveling, either press **<POWER>** to turn off the power, or unplug the power cord from the power outlet.

### **Operations During Playback**

### Adjusting the Master Volume

Either turn <MASTER VOLUME> or press [MASTER **VOLUME**].

### **Turning Off the Sound Temporarily (Muting)**

### Press [MUTE].

To cancel, press [MUTE] again. Muting can also be canceled by adjusting the master volume.

### **Listening with Headphones**

### Plug the headphones into <PHONES>.

The sound from the speakers and pre-out connectors is automatically cut.

### NOTE

Be careful not to set the volume too high when using headphones.

### **Playing Video and Audio Equipment**

### **Basic Operation**

### Prepare the equipment.

①Load the DVD, CD or other software in the player. (CP See the operating instructions of the respective devices.) (2) To play a video device, switch the monitor input. (C See the monitor's operating instructions.) **T**o operate using the main remote control unit, set the

**L** remote control unit to the AMP mode.

(C page 64 "Remote Control Unit Operations")

**3** Use SOURCE SELECT to select the input source.

GUI : "Source Select" (P page 39, 40)

#### Start playback.

Playback

### Listening to FM/AM Broadcasts

### **Basic Operation**

- **1** Either turn **<SOURCE SELECT>** or press **[TUNER]** (AMP mode) to select "TUNER".
  - **GUI** : "Source Select" (CP page 39, 40)
- 2 To operate using the main remote control unit, set the remote control unit to the TUNER (DEVICE1) mode.

(😰 page 64 "Remote Control Unit Operations")

**3** Press [BAND] to select "FM" or "AM".

# **4** Tune in the desired broadcast station.

#### ①To tune in automatically (Auto Tuning)

Press **[MODE]** to light the "AUTO" indicator on the display, then use **[AV]** to select the station you want to hear.

② To tune in manually (Manual Tuning) Press [MODE] to turn off the display's "AUTO" indicator, then use [▲▼] to select the station you want to hear.

## *.*

- It is also possible to switch to "FM" or "AM" in step 1 by pressing [TUNER].
- If the desired station cannot be tuned in with auto tuning, tune it in manually.
- $\bullet$  When tuning in stations manually, press and hold  $[\blacktriangle V]$  to change frequencies continuously.
- The time for which the GUI menus are displayed can be set at GUI menu "Manual Setup" "Option Setup" "GUI" "Tuner" (1277 page 37).

### Presetting Radio Stations (Preset Memory)

Your favorite broadcast stations can be preset so that you can tune them in easily. Up to 56 stations can be preset.

**1** Tune in the broadcast station you want to preset.

### **2** Press [MEM0].

**3** Press [A ~ G] to select the block in which the station is to be preset, then press [CHANNEL] or [1 ~ 8] to select the preset number.

# **4** Press [MEM0] again to complete the setting.

- To preset other stations, repeat steps 1 to 4.
- Stations can be preset automatically at GUI menu "Source Select" – "Tuner" – "Auto Preset" (27 page 40).

#### NOTE

Preset stations are erased by overwriting them.

### Listening to Preset Stations

#### **Operation on the Main Unit**

Press **<TUNING PRESET>**, then turn **<SOURCE SELECT>** to select the preset radio station.

### **Operation on the Main Remote Control Unit**

Recalling preset stations from the remote control unit

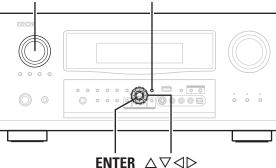

Press [A ~ G] to select the memory block.

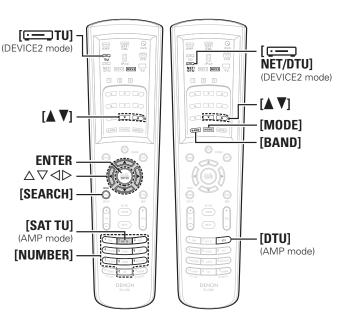

**2** Press [CHANNEL] or [1 ~ 8] to select the desired preset channel.

#### Default settings

### Listening to XM Satellite Radio **Programs**

### About XM Radio

XM is North America's number one satellite radio company, offering an extraordinary variety of commercial-free music, plus the best in premier sports, news, talk radio, comedy, children's and entertainment programming, broadcast in superior digital audio quality coast to coast. For more information, or to subscribe, U.S. customers visit xmradio. com or call XM Listener Care at 1-800- XMRADIO (1-800-967-2346); Canadian customers visit xmradio.ca or call XM Listener Care at 1-877-GETXMSR (1-877-438-9677).

### XM Ready<sup>®</sup> Legal

XM monthly service subscription sold separately. XM Mini-Tuner and Home Dock required (each sold separately) to receive XM service. It is prohibited to copy, decompile, disassemble, reverse engineer, hack, manipulate or otherwise make available any technology or software incorporated in receivers compatible with the XM satellite Radio System. Installation costs and other fees and taxes, including a one-time activation fee may apply. All fees and programming subject to change. Channels with frequent explicit language are indicated with an XL. Channel blocking is available for XM radio receivers by calling 1-800-XMRADIO (U.S. residents) and 1-877-GETXMSR (Canadian residents). XM Service only available in the 48 contiguous United States and Canada. ©2008 XM Satellite Radio Inc. All rights reserved.

### XM Ready<sup>®</sup> Subscription

Once you have installed the XM Mini-Tuner Home Dock, inserted the XM Mini-Tuner, connected the XM Mini-Tuner Home Dock to your XM Ready® audio system, and installed the antenna, you are ready to subscribe and begin receiving XM programming. There are three places to find your eight character XM Radio ID: On the XM Mini-Tuner, on the XM Mini-Tuner package, and on XM Channel 0. Record the Radio ID below for reference.

Note: The XM Radio ID does not use the letters "I", "O", "S" or "F". Activate your XM Satellite Radio service in the U.S. online at http://activate.xmradio.com or call 1-800-XMRADIO (1-800-967-2346). Activate your XM Satellite Radio service in Canada online at https://activate.xmradio.ca or call 1-877-GET-XMSR (1-877-438-9677). You will need a major credit card, XM will send a signal from the satellites to activate the full channel lineup. Activation normally takes 10-15 minutes, but during peak busy periods you may need to keep your XM Ready audio system on for up to an hour. When you can access the full lineup on your XM Ready audio system you are done.

### **Basic Operation**

Either turn <**SOURCE SELECT**> or press [**SAT TU**] (AMP mode) to select "XM".

GUI : "Source Select" (P page 39, 40)

#### To operate using the main remote control unit, set the remote control unit to the TUNER (DEVICE2) mode.

(C page 64 "Remote Control Unit Operations")

- **3** Use **[AV]** to select the channel. When the channel is tuned in, the name of the song and artist are displayed.

### ( )

- The channel switches continuously when [**\V**] is pressed and held.
- XM Radio channels can be preset using the same procedure as for FM/AM stations (Presetting Radio Stations (Preset Memory)" and "Listening to Preset Stations").
- The artist name, song title, category and reception level can be checked by pressing **<STATUS>**.
- The time for which the GUI menus are displayed can be set at GUI menu "Manual Setup" - "Option Setup" - "GUI" - "Tuner" (@ page 37).

# Checking the XM Signal Strength and Radio ID

Either turn <**SOURCE SELECT**> or press [**SAT TU**] (AMP mode) to select "XM".

# **2** Press **<STATUS>** until "SIGNAL" appears on the display.

The display will switch as shown below, depending on the reception conditions.

Display	GUI	Status
GOOD	- Til	Signal strength is good
MARGINAL	<b>M</b>	Signal strength is marginal
WEAK	<b>T</b>	Signal strength is weak
NO	Y	No signal

**3** Adjust the position of the antenna until "SIGNAL: GOOD" is shown on the display.

**4** Press **<STATUS>** until the channel (example: "XM001") is displayed.

### **Press** [**V**] and select channel 0 (XM000).

The radio ID is shown on the display.

XM000 RADIO ID

## 

The strength of both the XM satellite and terrestrial signals can be checked at GUI menu "Source Select" – "XM" – "Antenna Aiming" (12) page 43).

### **Searching Categories**

XM040 DeepTrks CAT: Rock -Channel category

**2** Use  $\triangleleft \triangleright$  to select the category, then use  $\triangle \bigtriangledown$  to select the desired channel.

### Accessing XM Radio Channels Directly

Press [SEARCH].

- **•** Press [NUMBER] then input the channel.
  - **Example:** Accessing channel "XM123":  $[1] \rightarrow [2] \rightarrow [3]$

% If no button is pressed within several seconds, the channel automatically switches to the one whose number has been input.

### **•** Press [ENTER] to set that channel.

**3** Reception switches to the selected channel.

### ø

- "LOADING" is displayed while channels or data are being received.
- "UPDATING" is displayed while the encoding code is being updated.
- "XM ---" is displayed if the selected channel cannot be used.

### **Listening to HD Radio Stations**

HD radio stations offer higher sound quality than conventional FM/AM broadcasts. It is also possible to receive data services and select broadcasts from among up to eight multicast programs.

### Using the HD Radio<sup>™</sup> Receiver

HD Radio technology provides higher quality sound than conventional broadcasts and allows reception of data services.

- FM sounds as sensational as CDs
- AM sounds as rich as analog FM stereo
- A variety of "data services", including text-based information, song title, artist name, album name, genre, etc. can be received.

Furthermore, in addition to conventional broadcasts, with HD Radio broadcasting it is possible to choose from up to 8 multicast programs.

For detailed information on HD Radio technology, please go to "www. ibiquity.com".

### H) Radio®

HD Radio<sup>™</sup> technology manufactured under license from iBiquity Digital Corporation. iBiquity Digital, the HD Radio logo, and the HD logo are registered trademarks of iBiquity Digital Corporation. HD Radio<sup>™</sup> is a trademark of iBiquity Digital Corporation. U.S. and Foreign Patents.

### **Basic Operation**

- Either turn <SOURCE SELECT> or press [DTU] (AMP mode) to select "HD Radio".
  GUI : "Source Select" (@ page 39, 40)
- **2** To operate using the main remote control unit, set the remote control unit to the NET/DTU (DEVICE2) mode.

(CP page 64 "Remote Control Unit Operations")

### Press [BAND] to select "FM" or "AM".

#### Tune in the desired broadcast station.

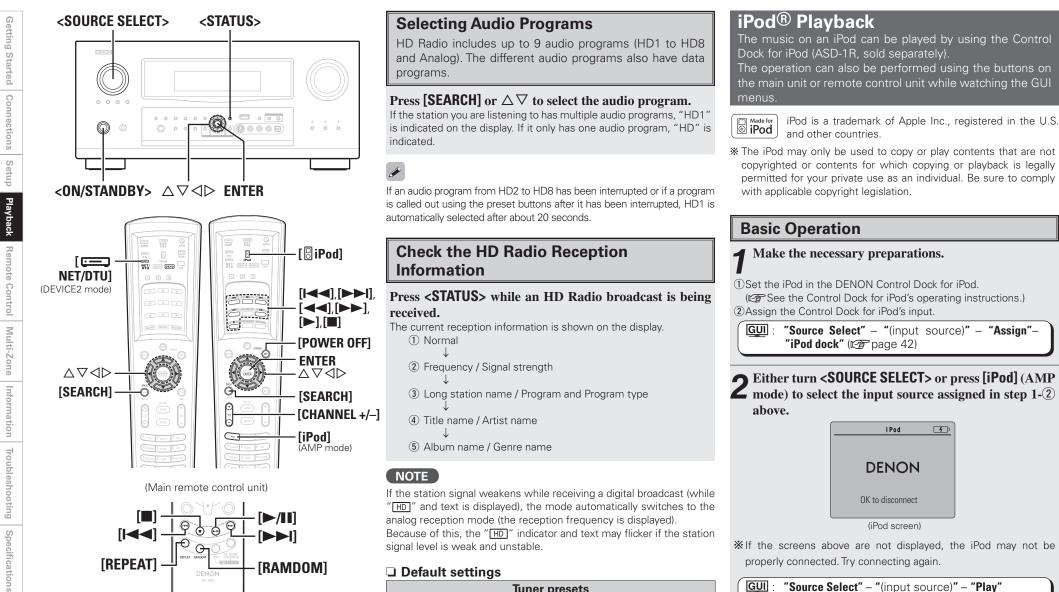

#### ①To tune in automatically (Auto Tuning)

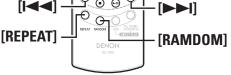

- Press **[MODE]** to select "HD Auto" or "Auto", then use **[AV]** to select the station you want to hear.
- The "HD" indicator lights on the display when an HD Radio station is tuned in.
- When "HD Auto" (tuning mode) is selected, only HD Radio stations are tuned in.
- If "Auto" (tuning mode) is selected, both HD Radio and analog stations are tuned in.
- ②To tune in manually (Manual Tuning)

Press [MODE] to select "Manual", then use [AV].

é

- It is also possible to switch to "FM" or "AM" at step 1 by pressing [DTU].
- If the desired station cannot be tuned in with auto tuning, tune it in manually.
- When tuning in stations manually, press and hold **[AV]** to change frequencies continuously.
- HD Radio stations can be preset using the same procedure as for FM/AM stations (Preset 50 "Presetting Radio Stations (Preset Memory)" and "Listening to Preset Stations"). In addition, with HD Radio, multicasts can also be preset.
- The time for which the GUI menu is displayed can be set at GUI menu "Manual Setup" – "Option Setup" – "GUI" – "Tuner" (127) page 37).

\* : Video may not be output, depending on the combination of ASD-1R and iPod.

- With the default settings, the iPod can be used connected to the VCR (iPod) connector.
- Use the RESTORER mode to expand the low and high frequency components of compressed audio files and achieve a richer sound. The default setting is "Mode3".
- Press <0N/STANDBY> or [POWER OFF] and set the AVR-4308CI's power to the standby mode before disconnecting the iPod. Also switch the input source to one to which the GUI menu "iPod dock" is not assigned before disconnecting the iPod.

### 

- Depending on the type of iPod and the software version, some functions may not operate.
- DENON will accept no responsibility whatsoever for any loss of iPod data.

### Listening to Music

Use  $\Delta \nabla$  to select the menu, then press **ENTER** or  $\triangleright$ to select the music file to be played.

#### $\frown$ Press ENTER or $\triangleright$ . Playback starts.

#### Stopping playback temporarily

### During playback, press **ENTER** or [>].

Press again to resume playback.

#### Fast-forwarding or fast-reversing

During playback, either press and hold  $\triangle$  (to fast-reverse) or  $\nabla$  (to fastforward), or press [

#### To cue to the beginning of a track

During playback, either press  $\Delta$  (to cue to the previous track) or  $\nabla$  (to cue to the next track), or press [I

#### To stop

During playback, either press and hold **ENTER** or press [

#### Playing repeatedly

Press [CHANNEL -] or [REPEAT] on the sub remote control unit.

[Selectable items] All One OFF GUI :

"Source Select" - "(input source)" -"Playback Mode (iPod)" - "Repeat" (CP page 41)

### Shuffling playback

Press [CHANNEL +] or [RANDOM] on the sub remote control unit.

[Selectable items] Albums Songs OFF

GUI : "Source Select" – "(input source)" – "Playback Mode (iPod)" - "Shuffle" (CP page 41)

#### Searching up or down pages

Press **[SEARCH]**, then press  $\triangleleft$  (down) or  $\triangleright$  (up). To cancel, press  $\Delta \nabla$  or **[SEARCH]**.

To switch between the Browse and Remote modes Either press and hold [SEARCH].

- The title name, artist name and album name can be checked by pressing **<STATUS>** during playback.
- On the AVR-4308CI, folder and file names can be displayed as titles. Any characters that cannot be displayed are replaced with ". (period)"
- The time for which the GUI menus are displayed can be set at GUI menu "Manual Setup" – "Option Setup" – "GUI" – "iPod" (🖙 page 37).

### **Viewing Still Pictures or Videos on the** iPod

Photo and video data on the iPod can be viewed on the monitor. (Only for iPod equipped with slideshow or video functions.)

#### Press and hold [SEARCH] to set the Remote mode. "Remote iPod" is displayed on the AVR-4308CI's display.

- $\frown$  Watching the iPod's screen, use  $\triangle \nabla$  to select "Photos" or "Videos".
- **3** Press ENTER until the image you want to view is displayed.

P

- "TV Out" at the iPod's "Slideshow Settings" or "Video Settings" must be set to "On" in order to display the iPod's photo data or videos on the monitor. For details, see the iPod's operating instructions.
- When unable to operate by the remote control unit, use the iPod unit.

### **Playing Network Audio or USB Memory Devices**

This procedure can be used to play Internet radio stations or music or still picture (JPEG) files stored on a computer or USB memory device.

#### About the Internet radio function

• Internet radio refers to radio broadcasts distributed over the Internet. Internet radio stations from around the world can be tuned in.

The AVR-4308CI is equipped with the following Internet radio functions:

- · Stations can be selected by genre and region.
- · Up to 56 Internet radio stations can be preset.
- · Internet radio stations in MP3 and WMA (Windows Media Audio) format can be listened to.
- · Your favorite radio stations can be registered by accessing an exclusive DENON Internet radio URL from a Web browser on a computer.
- \* The function is managed for individual users, so you must provide your MAC or e-mail address.
  - Exclusive URL: http://www.radiodenon.com
- \* The radio station database service may be suspended without notice.
- The AVR-4308CI's Internet radio station list is created using a radio station database service (vTuner). This database service provides a list edited and created for the AVR-4308CL

#### Music server

This function lets you play music files and playlists (m3u, wpl) stored on a computer (music server) connected to the AVR-4308CI via a network.

With the AVR-4308CI's network audio playback function, connection

- to the server is possible using one of the technologies below. · Windows Media Player Network Sharing Service
- · Windows Media DRM10

#### (Album art function)

When a WMA (Windows Media Audio), MP3 or MPEG-4 AAC file includes album art data, the album art can be displayed while the music files are playing.

For music files in WMA (Windows Media Audio) format, the album art is only played when using Windows Media Player ver. 11.

### [Slide show function]

Still picture (JPEG) files stored in folders on a music server can be played as slide shows.

The time for which each picture is displayed can be set.

### 

When still picture (JPEG) files are played on the AVR-4308CI, they are played in the direction in which they are stored in the folder, so store in them in the direction in which you want them to play.

#### Installing Windows Media Player ver. 11

- (1) If Windows XP Service Pack 2 has not vet been installed, either download it free of charge from Microsoft or install it via a Windows update installer.
- ② Download the latest version of Windows Media Player ver. 11, either directly from Microsoft or using a Windows update installer.
- \* When using Windows Vista, there is no need to download a new version of Windows Media Player.

#### **USB** memory devices

A USB memory device can be connected to the AVR-4308CI's USB port to play music and still picture (JPEG) files stored on the USB memory device.

- · Only USB memory devices conforming to mass storage class and MTP (Media Transfer Protocol) standards can be played on the AVR-4308CI.
- · The AVR-4308CI is compatible with USB memory devices in "FAT16" or "FAT32" format.

#### [Album art function]

When an MP3 music file includes album art data, the album art can be displayed while playing the file.

#### (Slide show function)

Still picture (JPEG) files stored on USB memory devices can be played as slide shows.

The time for which each picture is displayed can be set.

#### When still picture (JPEG) files are played on the AVR-4308CI, they are played in the direction in which they are stored in the folder, so store WAV format Quantization bit rate: 16 bits. in them in the direction in which you want them to play.

#### [Compatible formats]

	Internet radio	Music server <sup>※</sup>	USB <sup>%</sup>
WMA (Windows Media Audio)	0	0	•*
MP3 (MPEG-1 Audio Layer-3)	0	0	0
WAV	-	0	0
MPEG-4 AAC	-	<b>*</b>	<b>*</b>
<b>FLAC</b> (Free Lossless Audio Codec)	_	0	0
JPEG	-	0	0

A server or server software compatible with distribution in the corresponding formats is required to play music files via a network.

\*: Only files that are not protected by copyright can be played on the AVR-4308CI.

Contents downloaded from pay sites on the Internet are copyright protected. Also, files encoded in WMA format when ripped from a CD, etc., on a computer may be copyright protected, depending on the computer's settings.

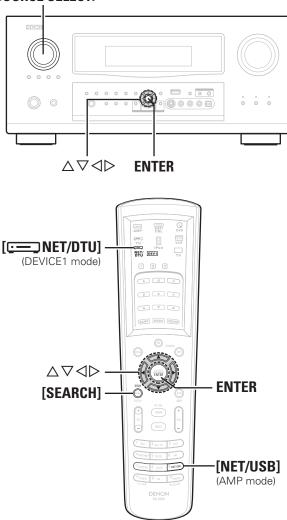

- Music server and USB
  - The AVR-4308Cl is compatible with MP3 ID3-Tag (Ver. 2) standards.
  - The AVR-4308CI is compatible with WMA META tags.

#### [Playable formats]

	Sampling frequency	Bit rate	Extension			
WMA (Windows Media Audio)	32/44.1/48 kHz	48~192 kbps	.wma			
MP3 (MPEG-1 Audio Layer-3)	32/44.1/48 kHz	32~320 kbps	.mp3			
WAV	32/44.1/48 kHz	_	.wav			
MPEG-4 AAC	32/44.1/48 kHz	16~320 kbps	.aac/.m4a/.mp4			
FLAC (Free Lossless Audio Codec)	32/44.1/48 kHz	_	.flac			

### <SOURCE SELECT>

#### About the button names in these explanations

- < > : Buttons on the main unit

#### Button name only:

Buttons on the main unit and remote control unit

### **Basic Operation**

#### **1** Make the necessary preparations.

- Check the network environment, then turn on the AVR-4308Cl's power. (Bp page 20 "Network Audio")
- If settings are required, make the network settings.
   (IP page 32 ~ 35 "Network Setup")
- ③ Prepare the computer. (\*\*\* Computer's operating instructions) Install "Windows Media Player ver. 11".

# **2** Either turn **<SOURCE SELECT>** or press [NET/USB] (AMP mode) to select "NET/USB".

GUI: "Source Select" -"NET/USB" -"Play" (@page 40)

**3** To operate using the main remote control unit, set the remote control unit to the NET/DTU (DEVICE 1) mode.

(CP page 64 "Remote Control Unit Operations")

**4** Use  $\triangle \nabla$  to select the menu, then press ENTER or  $\triangleright$  to select the file you want to play.

### **5** Press ENTER or **>**. Playback starts.

### Stopping playback temporarily

During playback, press **ENTER**. Press again to resume playback.

### To stop

During the play or pause mode, press and hold ENTER.

#### Searching up or down pages

Press **[SEARCH]**, then press  $\triangleleft$  (down) or  $\triangleright$ (up). To cancel, press  $\triangle \nabla$  or **[SEARCH]**.

#### Searching by first letter (Character search)

This operation is convenient for choosing items from the menu screens for Internet radio stations or files stored on the computer.

- ① When the menu screen is displayed, press [SEARCH] twice.
- ② Use 

   \Delta b to select the first letter you want to search for.

   If there are multiple items starting with the selected letter, they are
  - displayed in alphabetical order. If it is not possible to search the list, "unsorted list." is displayed.

### 

- Use the RESTORER mode to expand the low and high frequency components of compressed audio files and achieve a richer sound. The default setting is "Mode3".
- The time for which the GUI menus are displayed can be set at GUI menu "Manual Setup" "Option Setup" "GUI" "NET/USB" (1) page 37).
- The display can be switched between the artist name, track name, album name.
- The track display order differs with the server specification. When, due to the server specification, track display is not in alphabetical order, character search may not operate correctly.

#### About the button names in these explanations

- < > : Buttons on the main unit
- [ ] : Buttons on the remote control unit

#### Button name only:

Buttons on the main unit and remote control unit

### Listening to Internet Radio

**1** Use  $\triangle \nabla$  to select "Internet Radio", then press ENTER or  $\triangleright$ .

**2** Use  $\triangle \nabla$  to select the item you want to play, then press ENTER or  $\triangleright$ .

The station list is displayed.

**3** Use  $\Delta \nabla$  to select the station, then press ENTER or  $\triangleright$ .

Playback starts once buffering reaches "100%".

There are many Internet radio stations on the Internet, and the quality of the programs they broadcast as well as the bit rate of the tracks varies widely.

Generally, the higher the bit rate, the higher the sound quality, but depending on the communication lines and server traffic, the music or audio signals being streamed may be interrupted.

Inversely, lower bit rates mean a lower sound quality but less tendency for the sound to be interrupted.

- "Server Full" or "Connection Down" is displayed if the station is busy or not broadcasting.
- On the AVR-4308CI, folder and file names can be displayed as titles. Any characters that cannot be displayed are replaced with ". (period)".

### **Recently Played Internet Radio Stations**

Recently played internet radio stations can be selected from "Recently Played" in top menu.

**1** Use  $\Delta \nabla$  to select "Recently Played", then press **ENTER** or  $\triangleright$ .

**2** Use  $\triangle \nabla$  to select the item you want to play, then press ENTER or  $\triangleright$ .

### NOTE

Up to 20 stations stored in "Recently Played".

### **Presetting Internet Radio Stations**

Preset Internet radio stations can be selected directly.

While the Internet radio station you want to preset is playing, press [MEMO].

**2** Use  $\Delta \nabla$  to select "Preset", then press ENTER.

**3** Press [A ~ G], then press [1 ~ 8] to select the desired preset number. The Internet radio station is now preset.

## NOTE

If registered at a number that has already been preset, the previously registered setting is cleared.

### Listening to Preset Internet Radio Stations

# With the input source set to "NET/USB", press [A ~ G], then press [1 ~ 8].

The  $\ensuremath{AVR}\xspace$  automatically connects to the Internet and playback begins.

58

### **Registering Internet Radio Stations as** Your Favorites

Favorites are listed at the top of the menu screen, so when a station is registered as a favorite it can be tuned in easily.

Press [MEMO] while the Internet radio station you want to register is playing.

2	Use Z	1 √2	to select	"Favorites",	then	press	ENTER.

# **3** Press **4** to select "Yes".

The Internet radio station is registered. If you do not want to register it, press ▷.

# Listening to Internet Radio Stations Registered in Your Favorites

**1** Use  $\Delta \nabla$  to select "Favorites", then press ENTER or  $\triangleright$ .

**2** Use  $\triangle \nabla$  to select the Internet radio station, then press ENTER or  $\triangleright$ .

The AVR-4308CI automatically connects to the Internet and playback begins.

### **Clearing Internet Radio Stations from Your Favorites**

**1** Use  $\Delta \nabla$  to select "Favorites", then press ENTER or  $\triangleright$ .

**2** Use  $\triangle \nabla$  to select the Internet radio station you want to clear, then press [MEMO].

### **9** Press $\triangleleft$ to select "Delete".

J The selected Internet radio station is cleared. To cancel the operation without clearing the station, press ▷. **Playing Files Stored on a Computer** Use this procedure to play music files, image files or playlists.

**1** Use  $\triangle \nabla$  to select the host name of the computer on which the music file you want to play is located, then press ENTER or  $\triangleright$ .

**2** Use  $\triangle \nabla$  to select the search item or folder, then press **ENTER** or  $\triangleright$ .

**3** Use  $\Delta \nabla$  to select the file, then press ENTER or  $\triangleright$ . Playback starts once buffering reaches "100%".

### Selecting tracks

During playback, either press  $\Delta$  (previous track) or  $\nabla$  (next track).

### *.*

- When playing still picture (JPEG) files, files can also be selected using the operation described below.
- During playback, either press [▲] (previous file) or [▼] (next file). • Connections to the required system and specific settings must be
- Connections to the required system and specific settings must be made in order to play music files (12) page 20).
- Before starting, you must launch the computer's server software and set the files as server contents. For details, see the operating instructions of your server software.
- Depending on the size of the still picture (JPEG) file, some time may be required for the file to be displayed.

# Playing files that have been Preset or Registered in Your Favorites

Files can be preset, registered in your favorites and played using the same operations as for Internet radio stations.

#### NOTE

- Presettings are erased by overwriting them.
- When the operation described below is performed, the music server's database is updated and it may no longer be possible to play preset or favorite music files.
- When you quit the music server and then restart it.
- When music files are deleted or added on the music server.
- When using an ESCIENT server, place "ESCIENT" before the server name.

# Playing Files Stored on USB Memory Devices

Only USB memory devices conforming to mass storage class and MTP (Media Transfer Protocol) standards can be played on the AVR-4308CI.

#### **Basic Operation**

**1** Make the necessary preparations.

• Set the USB port to be used.

GUI : "Source Select" - "NET/USB" - "Playback Mode" -"USB Select" (@ page 42)

• Connect the USB memory device to the set USB port.

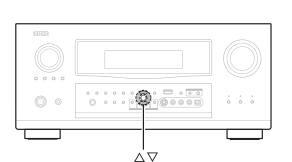

**9** Use  $\triangle \nabla$  to select "USB", then press ENTER or  $\triangleright$ .

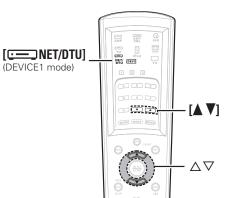

**3** Use  $\triangle \nabla$  to select the search item or folder, then press ENTER or  $\triangleright$ .

**4** Use  $\Delta \nabla$  to select the file, then press ENTER or  $\triangleright$ . Playback starts once buffering reaches "100%".

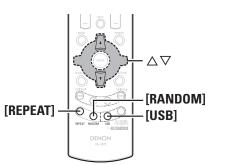

- By default, the front panel's USB port will be used.
- Depending on the size of the still picture (JPEG) file, some time may be required for the file to be displayed.

(Main remote control unit)

(Sub remote control unit)

#### About the button names in these explanations

- < > : Buttons on the main unit
- [ ] : Buttons on the remote control unit

#### Button name only:

Buttons on the main unit and remote control unit

### Playing repeatedly

Press [REPEAT] on the sub remote control unit.

### Playing in random order

Press [RANDOM] on the sub remote control unit.

### [Selectable items] ON OFF

GUI: "Source Select" - "NET/USB" - "Playback Mode" -"Random" (@ page 42)

#### Selecting tracks

During playback, either press  $\triangle$  (previous track) or  $\nabla$  (next track).

• When playing still picture (JPEG) files, tracks can also be selected using the operation described below.

During playback, either press [▲] (previous file) or [▼] (next file).

- If the USB memory device is divided into multiple partitions, only the top partition can be selected.
- The AVR-4308Cl is compatible with MP3 files conforming to "MPEG-1 Audio Layer-3" standards.
- If **[USB]** on the sub remote control unit is pressed when the USB memory device or folder is selected, all the tracks on the USB memory device or in the folder are played.

### NOTE

- The AVR-4308CI is equipped with two USB ports, one each on the front and rear panels. It is not possible to use the set with USB memory devices connected to both the ports at the same time. Select the USB port you want to use at the "Source Select" "NET/ USB" "Playback Mode" "USB Select" menu.
- DENON will accept no responsibility whatsoever for any loss or damage to data on USB memory devices when using the USB memory device connected to the AVR-4308CI.
- USB memory devices will not work via a USB hub.
- DENON does not guarantee that all USB memory devices will operate or receive power. When using a USB connection type portable hard disk of the type for which power can be supplied by connecting an AC adapter, we recommend using the AC adapter.
- It is not possible to connect and use a computer via the AVR-4308Cl's USB port using a USB cable.
- The AVR-4308Cl is not compatible with the iPod shuffle.

# Operating the AVR-4308Cl Using a Browser (Web control)

This function lets you operate the AVR-4308CI using Internet Explorer.

- **1** Switch "OFF" the "Power Saving" setting under "Manual Setup" "Network Setup" "Other" on the GUI menu (12) page 35).
- 2 Check the AVR-4308CI's IP address with "Manual Setup" "Network Setup" "Network Information" on the GUI menu (12) page 35).

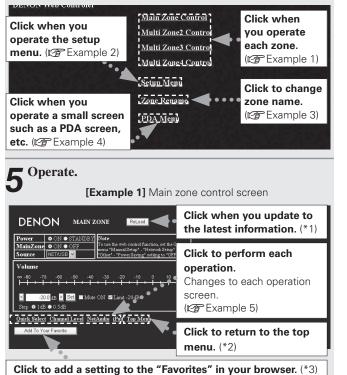

# **3** Enter the AVR-4308CI IP address in Internet Explorer's address box.

For example, if the IP address of AVR-4308Cl is "192.168.011.003", enter "http://192.168.11.3".

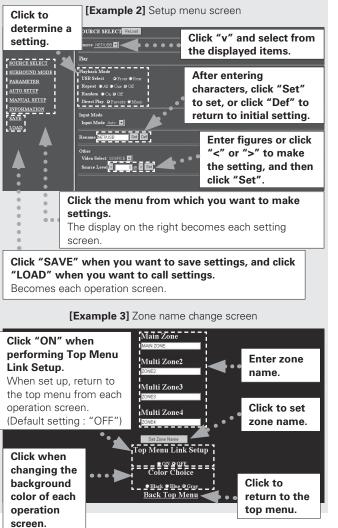

#### 🚰 INDEX - Microsoft Internet Explorer

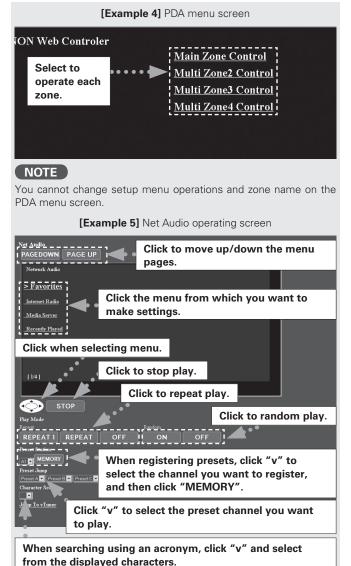

**4** When the top menu is displayed, click on the menu you want to operate.

- \*1 : Normally, there is a change to the latest information each time you operate. When operated from the main unit, click because the screen is not updated.
- \*2 : Displayed when setting "Top Menu Link Setup" to "ON" in [Example 3].
- \*3 : To avoid mistakenly performing menu operations of a zone you are not operating, we recommend that you register the setting contents for each zone under Favorites in your browser.

#### NOTE

- To perform web control, you must connect a web control device such as a PC to the same network as the AVR-4308Cl.
- With web control, some network settings, etc., cannot be set.
- When updating firmware, settings made by the web controller may be reset.

## **Other Operations and** Functions

### **Other Operations**

### **Playing Super Audio CD**

Assign "DENON LINK" or "HDMI" at the "Digital" or "HDMI" setting (P) page 42).

▲ Either turn <SOURCE SELECT> or press [SOURCE **Z** SELECT] to select the input source assigned in step 1. The "DLINK" or "HDMI" indicator lights on the display.

**•** Use INPUT MODE to select the input mode ( page **J** 41).

Select the input mode according to the program source to be played.

Select the surround mode (127 page 43, 44). We recommend playing in the DIRECT mode.

# **5** Start playing the Super Audio CD. The "IDSD!" indicator links

For operating instructions, refer to the respective equipment's operating instructions.

• When playing DSD signals in the DIRECT or PURE DIRECT mode, the DSD signals are converted as such into analog signals. When playing in other surround modes, the DSD signals are first converted into PCM format, then into analog signals.

• "DSD DIRECT" is shown on the display when playing DSD 2-channel signals in the DIRECT mode. "DSD MULTI DIRECT" is shown on the display when playing DSD multi--channel signals in the DIRECT mode.

### **Recording on an External Device** (REC OUT mode)

You can listen to one program source while recording a different program source.

### ▲ Turn <SOURCE SELECT> until "RECOUT SOURCE" *is displayed.*

The " REC " indicator lights.

# **3** Turn **<SOURCE SELECT>** to choose the input source to be recorded.

### Play the program source.

For operating instructions, refer to the respective equipment's operating instructions.

To record FM or AM broadcasts, select the broadcast (
 page 50).

### **E** Start recording.

Ð For operating instructions, refer to the respective equipment's operating instructions.

#### About the button names in these explanations

- < > : Buttons on the main unit
- [ ] : Buttons on the remote control unit

Button name only:

- To cancel, press <**ZONE2/3/4 / REC SELECT**>, then turn <**SOURCE SELECT**> until "ZONE2 SOURCE" is displayed.
- Make a test recording before starting the actual recording.
- Signals are only output to the analog REC OUT connectors when the digital signals input to the digital input connectors (OPTICAL/ COAXIAL) are PCM (2-channel) signals.
- Digital audio signals input to the DENON LINK or HDMI connectors are not output to the REC OUT connectors, so connect using the OPTICAL or COAXIAL connectors.
- Sources selected with the REC OUT mode are output from ZONE2 as well.
- In the REC OUT mode, the remote control unit's ZONE2 mode buttons cannot be operated.
- When the "Digital Out" setting is set to "ZONE4 Select", the OPTICAL3 output connector becomes the ZONE4 output. When using for recording, set to "Rec Select".
- The "XM" and "HD Radio" digital audio output signals are not output from the OPTICAL2 or OPTICAL3 output connectors. Also, network audio signals (Internet radio, music server, USB) are not output if they are copyright-protected.

### NOTE

- Recordings you make are for your personal enjoyment and should not be used for other purposes without permission of the copyright holder.
- When "DENON LINK" is assigned at the GUI menu "Assign" setting, the PCM signals, network audio signals (Internet radio, music server and USB), XM signals and HD Radio signals input from the digital input connectors cannot be output from the analog REC OUT connectors.
- Input sources for which "Delete" is selected at "Source Delete" cannot be selected.

## **Convenient Functions**

### **Channel Level**

You can adjust the channel level either according to the playback sources or to suit your taste, as described below.

### Press CH SELECT.

# $2 \overset{Use}{\to} \nabla \text{ or CH SELECT to select the speaker.} \\ The speaker that can be set switches each time one of the set switches be added and the set switch$

buttons is pressed.

### **9** Use $\triangleleft \triangleright$ to adjust the volume.

% "OFF" can be set by pressing ⊲ when the subwoofer's volume is set to −12 dB.

### **Fader Function**

This function lets you adjust (fade) the sound from all the front or rear speakers at once.

### Press CH SELECT.

### **Press** riangle abla or CH SELECT to select "Fader".

**3** Use  $\triangleleft \triangleright$  to adjust the volume of the speakers. ( $\triangleleft$ : front,  $\triangleright$ : rear)

*•* 

- The fader function does not affect the subwoofer.
- The fader can be adjusted until the volume of the speaker adjusted to the lowest value is -12 dB.

### **Quick Select Function**

With this function, the currently playing input source, input mode, surround mode, room EQ settings and volume can be stored in the memory.

**1** Set the input source, input mode, surround mode, room EQ settings and volume to the conditions you want to store.

### **•** Press and hold the desired **QUICK SELECT**.

Keep pressing the button until the quick select indicator lights.

### [Quick Select Defaults]

	Input Source	Volume
Quick Select 1	DVD	-40 dB
Quick Select 2	TV/CBL	-40 dB
Quick Select 3	VCR	-40 dB

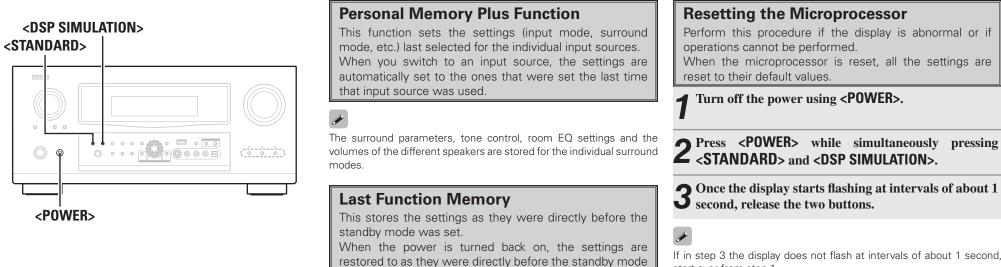

### ø

- To call out the settings, press **QUICK SELECT** at which the desired settings were stored.
- The Quick Select name can be changed (P page 37).

### NOTE

Input sources stored with the quick select function cannot be selected if they have been deleted at GUI menu "Manual Setup" – "Option Setup" – "Source Delete" (Page 37). In this case, store them again.

**Getting Started**

## **Remote Control Unit Operations**

### **Main Remote Control Unit**

- On the main remote control unit, the display switches according to the device being operated and the mode.
- In modes other than iPod, the mode switches between "DEVICE1" and "DEVICE2" each time the **[MODE** SELECTOR] is pressed.
- In the AMP, TUNER, NET/DTU and iPod modes, when the remote ID is set, the AVR-4308CI can be used independently even in an environment containing multiple **DENON** amplifiers.

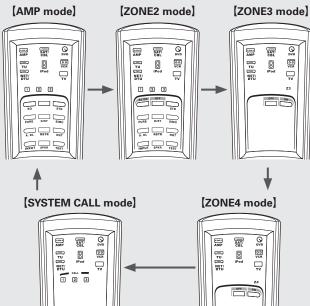

# **Operating DENON Audio Components**

#### Press [MODE SELECTOR] for the component to be operated.

: TV

- The indicator for the component to be operated flashes.
- : AMP/ZONE2/ZONE3/ZONE4 iPod / SYSTEM CALL iPod : TUNER (FM/AM) / XM τυ DVD player (Recorder) / CD player (Recorder) 00 : NETWORK/USB / NET/ VCR / TAPE VCR DIGITAL TUNER (HD Radio)
- SAT/ : Satellite Receiver / Cable TV

#### \* The mode switches each time [AMP] is pressed.

### Operate the component.

\* For details, refer to the component's operating instructions.

# P

**[HOME]** is used to return to the AMP mode (AMP. ZONE2, ZONE3, ZONE4 or SYSTEM CALL) when in any mode other than AMP.

### Presetting

The included main remote control unit can be preset to operate devices of various brands.

Press [MODE SELECTOR] for the device you want to preset.

• Press [NUMBER] and input the 5-digit number of the **J** brand of the component to be preset. The numbers are shown in the Preset Code Table (P End of the this manual).

When the code is registered, the signal transmission indicator flashes twice.

When the preset code is transmitted, the mode indicator for the component to which that code belongs flashes.

\* The input mode is canceled if no button is operated for 10 seconds.

Some brands have more than one preset code. If the component does not operate, try inputting a different code.

### **Operating Preset Components**

Press [MODE SELECTOR] for the component to be operated.

The mode indicator of the device to be operated flashes.

**Operate the component.** 

\* For details, refer to the component's operating instructions.

Depending on the model and year of manufacture of your equipment, some buttons may not operate.

### NOTE

The device mode ("DEVICE1" or "DEVICE2") cannot be changed while the setting is being made.

、 [◀◀], [▶▶], [Ⅲ], [■]	4	84001	52805	52814	72818	62839	62843
[==], [==]]							

### 

- When changing a setting, be sure to set the same remote ID as the AVR-4308Cl's (2 page 38).
- When changing the AMP mode's remote ID, also change the "TUNER", "iPod" and "NET/DTU" remote ID at the same time.
- Set the remote ID of an analog tuner for "TUNER" "DEVICE1", the XM remote ID for "DEVICE2"

### **Learning Function**

If your AV devices are of a brand other than DENON or if they cannot be operated with the preset memory function, their remote control signals can be transfered to stored in the AVR-4308Cl's main remote control unit.

set.

**2** Press and hold in [RC SETUP] for at least 3 seconds. The signal transmission indicator flashes twice.

#### Press [9], [7] and [5], in that order.

The signal transmission indicator flashes twice and the learning mode is set

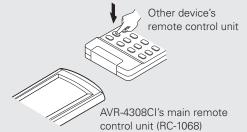

#### Press the button to be set.

The main remote control unit's display turns off.

\* If a button that cannot be learned is pressed, the signal transmission indicator lights but the signal is not learned.

### Point the main remote control units directly at each $\mathbf{O}$ other and press and hold the button on the other device's remote control unit that you want to learn.

Once learning is completed normally, the display lights and the signal transmission indicator flashes twice.

\* If you want to learn other buttons, repeat steps 4 and 5.

- \* The mode can be switched by pressing [MODE SELECTOR].
- \* The signal transmission indicator lights once for a long time if learning was not possible

### Press and hold in [RC SETUP] for at least 3 seconds.

The signal transmission indicator flashes twice and the setting D is completed.

### 

- With some remote control units, the signals cannot be learned or the device will not operate properly even when the signals have been learned. In this case, use the device's own remote control unit.
- Learned buttons have priority over the preset memory. If you no longer need the learned setting, reset the learning function (1) page 69).

### 

- [HOME] cannot be learned.
- Do not learn any remote control signals at [RC SETUP].
- The AMP ZONE2, ZONE3, ZONE4 and SYSTEM CALL modes cannot be learned.

Troubleshooting

Specifications

# **Sub Remote Control Unit Operations**

- The sub remote control unit is equipped with frequently used buttons, so it can be used for simple remote control unit operations.
- The sub remote control unit can also be used for multizone, so you can use it to control the AVR-4308Cl from other rooms.
- The operations listed below can be performed with the sub remote control unit.
- Switching the input source
- Adjusting the volume
- Tuner (AM/FM), XM, HD Radio and iPod operations
- NET/USB direct play
- GUI menu and ZONE2 on-screen display operationsZone power on/off
- It is not possible to operate devices other than th amplifier.

**Getting Started** 

Connections

Setup

# **Switching Zones**

Use this procedure to select the zone to be operated by the sub remote control unit.

## Press [ZONE SELECT].

The currently selected multi-zone indicator lights.

# • While the multi-zone indicator is light, press [ZONE] **SELECT**] to select the zone to be operated.

The currently selected multi-zone indicator lights.

# Setting the Zone for Which the Sub **Remote Control Unit is Used (ZONE SELECT LOCK Mode**)

We recommend always using the sub remote control unit for the same room. When this is done, the unit can be set so that the zone does not switch when buttons are operated.

Use the tip of a pen to press [ADVANCED SETUP]. All the multi-zone indicators light.

# ▲ Select the multi-zone to be set.

The selected multi-zone indicator lights.

(1) To set to "MAIN ZONE" : Press [REPEAT]. (2) To set to "ZONE2" : Press [RANDOM]. ③To set to "ZONE3" : Press [USB]. (4) To set to "ZONE4"

: Press [ALL MUSIC/FAVORITES].

• Use the tip of a pen to press [ADVANCED SETUP]. The multi-zone indicator turns off.

# **To Cancel**

Use the tip of a pen to press [ADVANCED SETUP]. The currently selected multi-zone indicator lights.

Press [ZONE SELECT].

All the multi-zone indicators light.

# **•** Use the tip of a pen to press [ADVANCED SETUP].

The multi-zone indicator turns off.

# Setting the Remote ID

When using multiple DENON AV receivers in the same room, make this setting so that no AV receiver other than the desired one operates.

# While pressing [MENU], press [ADVANCED SETUP] with the tip of a pen.

The multi-zone indicator corresponding to the currently selected remote ID flashes.

# Select the remote ID to be set.

- 1) To set to 1 : Press [REPEAT]. The "M" indicator flashes.
- (2) To set to 2 : Press [RANDOM].
- The "Z2" indicator flashes.
- 3 To set to 3 : Press [USB].
- The "Z3" indicator flashes.
- (4) To set to 4 : Press [ALL MUSIC/FAVORITES].

The "Z4" indicator flashes.

#### • While pressing [MENU], press [ADVANCED SETUP] **J** with the tip of a pen. The multi-zone indicator turns off.

# 

When changing a setting, be sure to set the same remote ID as the AVR-4308Cl's (2 page 38).

# **Resetting the Settings**

## While pressing [ZONE OFF], press [ADVANCED SETUP] with the tip of a pen.

All the multi-zone indicators flash 4 times, then all the settings are restored to their defaults.

# Amp Assign / Multi Zone **Connections and Operations**

The AVR-4308Cl is compatible with the following types of playback:

- Multi-zone playback (ZONE2 & ZONE3)
- Bi-amp playback (front speaker) · Bi-wiring playback (front speaker)

# NOTE

- · For bi-amp and bi-wiring playback, use speakers compatible with that type of connection.
- When conducting bi-amp or bi-wiring playback, remove the shortcircuiting boards (or wires) from the speaker terminals.

# Multi-Zone Settings with the Amp **Assign Function**

The amp assign function lets you assign the amplifiers for the different channels built into the AVR-4308CI to the speaker outputs for the different zones.

Select the desired playback environment from among "Setting 1" to "Setting 6", then set the corresponding "Amp Assign" mode at GUI menu "Manual Setup" - "Option Setup" - "Amp Assign" (Cr page 37).

Connect the speakers as described at "Speaker connections".

# ¢,

With "Setting 4" to "Setting 6", it is possible to switch the Amp Assign mode between the 7.1-channel mode and the multizone mode without changing the speaker connections.

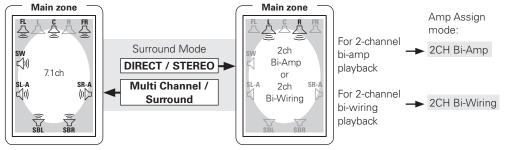

Getting Started Connections

Setting 1 : With this setting it is possible to switch between the following two playback modes. •7.1-channel playback

• Switching between bi-amp and bi-wiring playback using speakers exclusively for 2-channel playback

# Multi-Zone Settings and Operations with Zone Pre-out Output

Prepare power amplifiers for ZONE2 and ZONE3, an amplifier that is compatible with bit-stream input for ZONE4.

	Connectors for audio output	Audio signals	Connectors for video output
ZONE2	ZONE2 PRE OUT	Stereo	ZONE2 VIDEO OUT, ZONE2 COMPONENT VIDEO OUT
ZONE3	ZONE3 PRE OUT	Stereo	_
ZONE4	ZONE4 OPTICAL3 OUT	Bit-stream	_

When only using one speaker for ZONE2 or ZONE3, set to "Mono". In this case, the ZONE2 (ZONE3) monaural output is output from the ZONE2 (ZONE3) pre-out L and R connectors, so connect as desired.
Separate power amplifiers are needed for ZONE2 and ZONE3.

- : Buttons on the main unit < >
- 1 1 : Buttons on the remote control unit

#### Button name only:

Buttons on the main unit and remote control unit

# Multi-Zone Operations

# **Turning the Power On and Off**

#### (Operation on the main unit)

Press <ZONE2 ON/OFF>, <ZONE3 ON/OFF> or <ZONE4 ON/OFF> for the zone to be operated.

When the power turns on, the multi-zone indicator lights on the display.

#### (Operation on the remote control unit)

In the zone mode you want to operate, press [ON] or [OFF].

# **Selecting the Input Source**

#### [Operation on the main unit]

(1) Press <**ZONE2/3/4 / REC SELECT>** and select the zone to be adjusted. (2) Turn <SOURCE SELECT>.

#### [Operation on the remote control unit]

In the zone mode you want to operate, press [SOURCE SELECT].

# **Adjusting the Volume**

# [Operation on the main unit]

① Press <ZONE2/3/4 / REC SELECT> and select the zone to be adjusted. (2) Turn **<VOLUME>** to adjust.

# (Operation on the remote control unit)

In the zone mode whose volume you want to adjust, press [VOLUME].

[Variable range] --- -70dB ~ -40dB 18dB

# 

- The volume can be adjusted when GUI menu "Manual Setup" - "Zone Setup" - "(select the zone)" - "Volume Level" is set to
- "Variable". The volume can be increased up to the value set at GUI menu "Manual Setup" - "Zone Setup" - "(select the zone)" - "Volume Limit" (B page 36).
- The volume for ZONE2 and ZONE3 can be adjusted with the remote control unit.

# **Turning off the Sound Temporarily**

In the zone mode for which you want to mute the sound, press [MUTE].

The sound is reduced to the level set at GUI menu "Manual Setup" - "Zone Setup" - "(select the zone)" - "Mute Level" (
page 36). To cancel, either adjust the volume or press [MUTE] again. The setting is canceled when the zone's power is turned off.

- The source selected for ZONE2 is also output from the recording output connectors.
- For ZONE2, the "Zone Setup" can be made while watching the onscreen display. Also, when ZONE3 is operated, the on-screen display appears on the ZONE2 monitor, so operation can be performed watching this on-screen display.

ZONE2 MENU		J	
INPUT :DVD SIGNAL:ANALOG VOL. :-40dB >Bass ↓ Treble ↓ HPF ↓ Lch Lev. ↓ Rch Lev. ↓	0 d B I 0 d B I O F F I 0 d B I 0 d B I	ZONE2 MENU Channel Vol.Lev. Vol.Limit P.OnLev. MuteLev.	<pre>     STEREO     VAR     OFF     LAST     FULL </pre>

# NOTE

- When connected to the component video output connectors, the on-screen display is not displayed.
- When the input source to which the digital input connectors (OPTICAL/COAXIAL) are assigned is selected in ZONE2 or ZONE3, playback is only possible if the digital signal being input is in PCM (2-channel) format.
- Digital audio signals input from the DENON LINK or HDMI connectors cannot be played in multi-zone.
- In ZONE4, it is not possible to select "XM", "HD Radio", or sources with no digital input signals ("TUNER", "PHONO", "iPod", etc.). Network audio signals (Internet radio, music server, USB) can be played as long as they are not copyright-protected.
- When certain digital signals are being input, noise may be output from the ZONE2 and ZONE3 audio output connectors.
- When "DENON LINK" is assigned at the GUI menu "Assign" setting, the PCM signals, network audio signals (Internet radio, music server and USB), XM signals and HD Radio signals input from the digital input connectors cannot be output from the ZONE2 and ZONE3 audio output connectors.

Troubleshooting Specifications

**Getting Started** 

# **Getting Started**

# **Other Information**

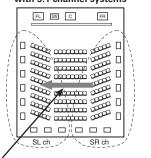

# **About Speaker Installation**

# **Surround back speakers**

Sound positioning directly to the rear can be achieved easily by adding a surround back speaker to a 5.1-channel system.

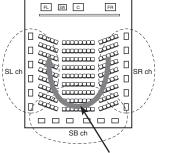

In addition, the acoustic image extending between the sides and the rear is narrowed, thus greatly improving the expression of the surround signals for sounds moving from the sides to the back and from the front to the point directly behind the listening position.

Change of positioning and acoustic image with 5.1-channel systems

Movement of acoustic image from SR to SL

Change of positioning and acoustic image with 6.1-channel systems

Movement of acoustic image from SR to SB to SL

In addition to sources recorded in 6.1-channels, the surround effect of conventional 2- to 5 1-channel sources can also be enhanced

#### Number of surround back speakers

We recommend using 2 speakers. When using dipolar speakers in particular, be sure to use 2 speakers.

#### Placement of the surround left and right channels when using surround back speakers

We recommend installing the speakers for the surround "L" and "R" channels a bit forward.

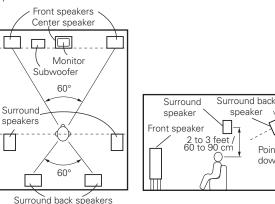

# **Examples of speaker layouts**

Below we introduce examples of speaker layouts. Refer to these to arrange your speakers according to their type and how you want to use them.

#### [1] Using surround back speaker(s)

#### **(1)** When mainly playing movies

Recommended when your surround speakers are single or 2-way speakers.

[As seen from above]

#### [As seen from the side]

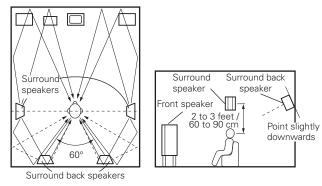

Point slightly

downwards

#### (2) Setting for primarily watching movies using diffusion type speakers for the surround speakers

For the greatest sense of surround sound envelopment, diffuse radiation speakers such as bipolar types, or dipolar types, provide a wider dispersion than is possible to obtain from a direct radiating speaker (monopolar). Place these speakers at either side of the prime listening position, mounted above ear level.

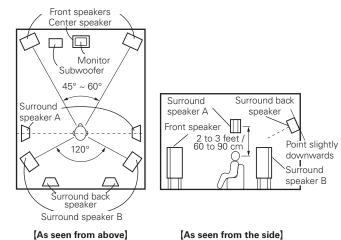

#### Path of the surround sound from the speakers to the listening position

[As seen from above]

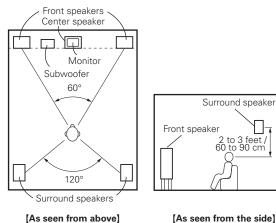

#### [As seen from the side]

#### ③ When playing movies and music

77

#### [2] When not using surround back speakers

# Surround

The AVR-4308Cl is equipped with a digital signal processing circuit that lets you play program sources in the surround mode to achieve the same sense of presence as in a movie theater.

# **Dolby Surround**

# **Dolby Digital**

Dolby Digital is a multichannel digital signal format developed by Dolby Laboratories.

A total of 5.1-channels are played: 3 front channels ("FL", "FR" and "C"), 2 surround channels ("SL" and "SR") and the "LFE" channel for low frequencies.

Because of this, there is no crosstalk between channels and a realistic sound field with a "three-dimensional" feeling (sense of distance, movement and positioning) is achieved.

A real, overpowering sense of presence is achieved when playing movie sources in AV rooms as well.

# **Dolby Digital Plus**

Dolby Digital Plus is an improved Dolby Digital signal format that is compatible with up to 7.1-channels of discrete digital sound and also improves sound quality thanks to extra data bit rate performance. It is upwardly compatible with conventional Dolby Digital, so it offers greater flexibility in response to the source signal and the conditions of the playback equipment.

#### **Dolby TrueHD**

Dolby TrueHD is a high definition audio technology developed by Dolby Laboratories, using lossless coding technology to faithfully reproduce the sound of the studio master.

This format is compatible with a maximum sampling frequency of 96 kHz and up to 7.1-channels, so it is used for applications particularly prioritizing sound quality.

#### Dolby Pro Logic II

Dolby Pro Logic  $\ensuremath{I\!I}$  is a matrix decoding technology developed by Dolby Laboratories.

Regular music such as that on CDs is encoded into 5-channels to achieve an excellent surround effect.

The surround channel signals are converted into stereo and full band signals (with a frequency response of 20 Hz to 20 kHz or greater) to create a "three-dimensional" sound image offering a rich sense of presence for all stereo sources.

# Dolby Pro Logic IIx

Dolby Pro Logic  $I\!Ix$  is a further improved version of the Dolby Pro Logic  $I\!I$  matrix decoding technology.

Audio signals recorded in 2-channels are decoded to achieve a natural sound with up to 7.1-channels.

There are 3 modes: "Music" suited for playing music, "Cinema" suited for playing movies, and "Game" which is optimized for playing games.

# **Dolby Digital EX**

Dolby Digital EX is a 6.1-channel surround format proposed by Dolby Laboratories that allows users to enjoy in their homes the "DOLBY DIGITAL SURROUND EX" audio format jointly developed by Dolby Laboratories and Lucas Films.

The 6.1 channels of sound, including surround back channels, provide improved sound positioning and expression of space.

## **\* Sources recorded in Dolby Surround**

Sources recorded in Dolby Surround are indicated with the following logo marks.

Dolby Surround support mark : DC DOLBY SURROUND

Manufactured under license from Dolby Laboratories. "Dolby", "Pro Logic" and the double-D symbol are trademarks of Dolby Laboratories.

# **DTS Surround**

# DTS Digital Surround

DTS Digital Surround is the standard digital surround format of DTS, Inc., compatible with a sampling frequency of 44.1 or 48 kHz and up to 5.1-channels of digital discrete surround sound.

# DTS-HD High Resolution Audio

DTS-HD High Resolution Audio is an improved version of the conventional DTS, DTS-ES and DTS 96/24 signals formats, compatible with sampling frequencies of 96 or 48 kHz and up to 7.1-channels of discrete digital sound. High data bit rate performance provides high quality sound. This format is fully compatible with conventional products, including conventional DTS digital surround 5.1-channel data.

# DTS-HD Master Audio

DTS-HD Master Audio is DTS, Inc's lossless audio format compatible with up to 96 kHz/7.1-channels. The lossless audio coding technology faithfully reproduces the sound of the studio master. It is fully compatible with conventional products, including conventional DTS digital surround 5.1-channel data.

# DTS-ES<sup>™</sup> Discrete 6.1

DTS-ES<sup>™</sup> Discrete 6.1 is a 6.1-channel discrete digital audio format adding a surround back (SB) channel to the DTS digital surround sound. Decoding of conventional 5.1-channel audio signals is also possible according to the decoder.

# DTS-ES<sup>™</sup> Matrix 6.1

DTS-ES<sup>TM</sup> Matrix 6.1 is a 6.1-channel discrete digital audio format inserting a surround back (SB) channel to the DTS digital surround sound through matrix encoding. Decoding of conventional 5.1-channel audio signals is also possible according to the decoder.

# DTS NEO:6<sup>™</sup> Surround

DTS NEO:6<sup>™</sup> is a matrix decoding technology for achieving 6.1channel surround playback with 2-channel sources. It includes "DTS NEO:6 CINEMA" suited for playing movies and "DTS NEO:6 MUSIC" suited for playing music. **Getting Started** 

#### DTS 96/24

Specifications

DTS 96/24 is a digital audio format enabling high sound quality playback in 5.1-channels with a sampling frequency of 96 kHz and 24 bit quantization on DVD-Video.

Manufactured under license under U.S. Patent #'s: 5,451,942; 5,956,674; 5,974,380; 5,978,762; 6,226,616; 6,487,535 & other U.S. and worldwide patents issued & pending. DTS is a registered trademark and the DTS logos, Symbol, DTS-HD and DTS-HD Master Audio are trademarks of DTS, Inc.<sup>©</sup> 1996-2007 DTS, Inc. All Rights Reserved.

Neural Surround<sup>™</sup>, a breakthrough in audio technology, will bring the

excitement of surround music to more of America's listening audience.

It provides the rich envelopment and discrete image detail of surround

sound in a format 100 % compatible with stereo. With superior

spectral resolution and channel separation, Neural Surround<sup>™</sup> draws

the brain's attention to sonic details in musical instruments, vocals,

and ambience that are typically masked by other playback systems.

This allows the listener to fully experience the richness and subtleties

in recorded performance as never before. As the chosen format for XM

Satellite Radio's new XM HD surround programming, Neural Surround

will help deliver more surround music to more listeners than any other

broadcast format, XM Satellite Radio will be the first radio company to

broadcast surround sound on the radio 24 hours a day and will offer

three channels fully dedicated to Neural Surround™ music. This alone

will amount to more than 25.000 hours of Neural Surround™ music

# Audyssey MultEQ<sup>®</sup> XT

Audyssey MultEQ<sup>®</sup> XT is the first technology to properly measure sound information throughout a listening area, then combine this information to accurately represent the acoustical problems in the room. Based on these measurements, MultEQ XT calculates an equalization solution that corrects for both time and frequency response problems in every seat. Audyssey MultEQ XT not only corrects frequency response problem in a large listening area but also performs a fully automated surround system setup.

For a detailed description, see page 25.

# 

Audyssey MultEQ<sup>®</sup> XT is a trademark of Audyssey Laboratories. It is licensed under U.S. and National Patent Applications 20030235318 and 10/700,220. Additional U.S. and Foreign Patents pending. MultEQ XT and the Audyssey MultEQ XT logo are trademarks of Audyssey Laboratories, Inc. All rights reserved.

# HDCD<sup>®</sup> (High Definition Compatible Digital<sup>®</sup>)

HDCD<sup>®</sup> is an encoding/decoding technology that greatly reduces the distortion that occurs upon digital recording while maintaining compatibility with the conventional CD format, thus expanding the dynamic range and achieving a high resolution.

Conventional CDs and HDCD compatible CDs are identified automatically to select the optimum digital processing.

**HOCD**<sup>®</sup>, HDCD<sup>®</sup>, High Definition Compatible Digital<sup>®</sup> and Microsoft<sup>®</sup> are either registered trademarks or trademarks of Microsoft Corporation, Inc. in the United States and/or other countries. HDCD system manufactured under license from Microsoft Corporation, Inc. This product is covered by one or more of the following: In the USA: 5,479,168, 5,638,074, 5,640,161, 5,808,574, 5,838,274, 5,854,600, 5,864,311, 5,872,531, and in Australia: 669114. Other patents pending.

# **DENON LINK**

DENON LINK is a unique digital, balanced transfer type interface developed by DENON. It offers high speed, high quality transfer of digital audio data with low signal loss. It can be used together with DENON DVD players equipped with a special DENON LINK connector using a single cable to enable playback with high sound quality. It allows digital transfer of the 192 kHz/24 bit 2-channel digital signals of DVD-Audio discs, PCM multi-channel signals, etc. Full-spec digital transfer of the audio contents of Super Audio CD is possible by connecting a player equipped for DENON LINK 3rd Edition.

# Advanced AL24 Processing Multi channel

# Equipped with "Advanced AL24 Processing" time axis region information volume expansion

In addition to the existing "AL24 Processing Plus" bit expansion technology, DENON has also developed "Advanced AL24 Processing" that dramatically improves information volume in the time axis region using high-speed signal detection and processing technology. In addition to expanding original 16-bit digital data to 24 bits, "Advanced AL24 Processing" uses data interpolation along the time axis or up-converted sampling to achieve natural interpolation without losing the original data. A digital filter is used to further expand adaptability and perform optimum filtering calculations for ringing-free pulse response, pulsive music data and attack sounds.

This results in the reproduction of such spatial information as the delicate nuances in the music, the positions of the performers, and the breadth, height, and depth of the concert hall. "Advanced AL24 Processing" is conducted for all channels and modes other than DSD DIRECT.

# 

each year.

**Neural Surround** 

This product is manufactured under license from Neural Audio Corporation.

D&M Holdings Inc. hereby grants the user a non-exclusive, nontransferable, limited license right exercisable to use the NA SURROUND Technology and other US and World Wide Patents Pending technology.

"Neural" and "Neural Audio" and "Neural Surround" are trademarks of Neural Audio Corporation. All Rights Reserved.

# HDMI (High-Definition Multimedia Interface)

HDMI is a digital interface standard for next generation TVs based on DVI (Digital Visual Interface) standards and optimized for use in consumer equipment.

Non-compressed digital video and multi-channel audio signals are transmitted with a single connection.

HDMI is also compatible with HDCP (High-bandwidth Digital Contents Protection), a technology for protecting copyrights that encrypts digital video signals in the same was as with DVI.

#### **Deep Color**

Eliminates on-screen color banding, for smooth tonal transitions and subtle gradations between colors.

Enables increased contrast ratio.

Can represent many times more shades of gray between black and white.

At 30-bit pixel depth, a four times improvement would be the minimum, and the typical improvement would be eight times or more.

#### **xvYCC**

Next-generation "xvYCC" color space supports 1.8 times as many colors as existing HDTV signals. Lets HDTVs display colors more accurately.

Enables displays with natural, vivid colors.

#### Lip Sync

Because consumer electronics devices are using increasingly complex digital signal processing to enhance the clarity and detail of the content, synchronization of video and audio in user devices has become a greater challenge and could potentially require complex enduser adjustments. HDMI 1.3 incorporates an automatic video/audio synching capability that allows devices to perform this synchronization automatically with total accuracy.

"HDMI", "HDMI logo" and "High-Definition Multimedia Interface" are trademarks or registered trademarks of HDMI Licensing LLC.

- Some contents may not be compatible with other DLNA CERTIFIED™ products.

# Windows Media DRM

A copyright-protected technology developed by Microsoft.

- Windows Vista and the Windows logo are trademarks of the Microsoft group of companies.
- The PlaysForSure logo, Windows Media and the Windows logo are trademarks or registered trademarks of Microsoft Corporation in the United States and/or other countries.
- Content providers are using the digital rights management technology for Windows Media contained in this device (WM-DRM) to protect the integrity of their content (Secure Content) so that their intellectual property, including copyright, in such content is not misappropriated. This device uses WM-DRM software to play Secure Content (WM-DRM Software). If the security of the WM-DRM Software in this device has been compromised, owners of Secure Content (Secure Content Owners) may request that Microsoft revoke the WM-DRM Software's right to acquire new licenses to copy, display and/or play Secure Content. Revocation does not alter the WM-DRM Software's ability to play unprotected content. A list of revoked WM-DRM Software is sent to your device whenever you download a license for Secure Content from the Internet or from a PC. Microsoft may, in conjunction with such license, also download revocation list onto your device on behalf of Secure Content Owners.

# **About Wireless LAN**

#### Wi-Fi®

Wi-Fi Certification assures tested and proven interoperability by the Wi-Fi Alliance, a group certifying interoperability among wireless LAN devices.

#### IEEE 802.11b

This is one wireless LAN standard set by the 802 working group that establishes LAN technology standards at the IEEE (Institute of Electrical and Electronics Engineers) of the United States. It uses the 2.4 GHz band usable freely without a radio frequency license (ISM band), enabling communications at a maximum speed of 11 Mbps.

# 

The value indicated above is the maximum theoretical value for the wireless LAN standard, and does not indicate the actual data transfer rate.

#### IEEE 802.11g

This is another wireless LAN standard set by the 802 working group that establishes LAN technology standards at the IEEE (Institute of Electrical and Electronics Engineers) of the United States, and is compatible with IEEE 802.11b. It also uses the 2.4 GHz band, but enables communications at a maximum speed of 54 Mbps.

# ø

The value indicated above is the maximum theoretical value for the wireless LAN standard, and does not indicate the actual data transfer rate.

#### Infrastructure Communications

"Infrastructure Communications" refers to networks using wireless LAN access points.

This function can be used to connect to the Internet or a wired LAN via a wireless LAN access point. Wireless LAN access points include wireless broadband routers.

#### Ad-hoc Communications

Signal transfer through wireless interconnection of computers is referred to as "ad hoc communications". With such ad hoc communications there is no connection to the Internet. Ad hoc communications are suited for establishing simple temporary networks.

# Network Names (SSID: Security Set Identifier)

When forming wireless LAN networks, groups are formed to prevent interference, data theft, etc. This grouping is done by "SSID" or "Security Set Identifiers". For further security, a WEP key is set and signal transfer is not possible unless the SSID and WEP key match.

# WEP Key (Network Key)

This is key information used for encrypting data when conducting data transfer. On the AVR-4308CI, the same WEP key is used for data encryption and decryption, so the same WEP key must be set on both devices in order for communications to be established between them.

**Getting Started** 

#### WPA (Wi-Fi Protected Access)

This is a security standard established by the Wi-Fi Alliance. In addition to the conventional SSID (network name) and WEP key (network key), it also uses a user identification function and encrypting protocol for stronger security.

#### WPA2 (Wi-Fi Protected Access 2)

This is a new version of the WPA established by the Wi-Fi Alliance, compatible with more secure AES encryption.

# WPA-PSK/WPA2-PSK (Pre-shared Key)

This is a simple authentication system for mutual authentication when a preset character string matches on the wireless LAN access point and client.

#### Passphrase

This refers to the code key used for WPA-PSK/WPA2-PSK authentication, a WPA authentication method.

## TKIP (Temporal Key Integrity Protocol)

This is a network key used for WPA. The encryption algorithm is RC4, the same as for WEP, but the security level is increased by changing the network key used for encryption for each packet.

#### AES (Advanced Encryption Standard)

This is a next generation standard encryption method replacing the current DES and 3DES, and because of its high security it is expected to be applied widely to wireless LANs in the future. It uses the "Rijndael" algorithm developed by two Belgian cryptographers to divide the data into blocks of fixed lengths and encrypt each block. It supports data lengths of 128, 192 and 256 bits and key lengths of 128, 192 and 256 bits as well, offering extremely high encryption security.

# **Relationship Between Video Signals and Monitor Output**

: Output according to "Resolution" setting (i/p Scaler : When "H to H" is set) (12 page 30).

: GUI menu not displayed

• The MAIN ZONE video conversion function is compatible with the following formats: NTSC, PAL, SECAM, NTSC4,43, PAL -N, PAL -M and PAL -60.

- When SECAM signals of video input are up-converted, the signals are output in PAL format from the S-Video connector.
- If the input signal is a component 1080p signal, up-converting to HDMI is not possible.

• The GUI menu display cannot be superimposed when xvYCC signals and component 1080p signal, computer's resolution (e.g. VGA) are input.

# Troubleshooting

If a problem should arise, first check the following:

- 1. Are the connections correct?
- 2. Is the set being operated as described in the owner's manual?
- 3. Are the other components operating properly?

If this unit does not operate properly, check the items listed in the table below. Should the problem persist, there may be a malfunction.

In this case, disconnect the power immediately and contact your store of purchase.

#### [General]

Symptom	Cause	Countermeasure	Page
Power does not turn on, or turns off directly after it was turned on.	• Connection of the power cord is faulty.	• Check that the power plugs are securely inserted into the AVR- 4308Cl's AC inlets and the wall power outlet.	22
No sound is produced from speakers.	<ul> <li>Connection with the input devices or connection of the speaker cables is faulty.</li> </ul>	Check the connections.	9
	• Device you want to play and set input source do not match.	<ul> <li>Select an appropriate input source.</li> </ul>	39, 40
	Master volume is turned too low.	<ul> <li>Adjust the master volume to an appropriate level.</li> </ul>	49
	• Mute mode is set.	Cancel the mute mode.	49
	• Headphones are connected.	• Disconnect the headphones.	49
	No digital signals are being input.	<ul> <li>Select an input source for which the digital input setting has been made.</li> </ul>	42
	• The connectors to which the digital inputs are assigned and the settable input modes do not match.	Set the input mode.	42
Display is off.	• The "Dimmer" setting is set to "OFF".	• Set to something other than "OFF".	38
	• The PURE DIRECT mode is set.	• Set a surround mode other than the PURE DIRECT mode.	43, 44
"DOLBY DIGITAL" indicator does not appear on display.	<ul> <li>DVD player's digital audio output setting is not proper.</li> </ul>	• Check the DVD player's audio output setting. For details, read the DVD player's operating instructions.	_

Symptom	Cause	Countermeasure	Page
Power turns off suddenly and power indicator	• Protection circuit activated due to rise of internal temperature.	• Turn off the power, wait for the set to fully cool down, then turn the power back on.	10
flashes red.		<ul> <li>Place the set in a well-ventilated place.</li> </ul>	10
	<ul> <li>Core wires of two speakers are touching each other or a core wire is sticking out of the terminal and touching the set's rear panel, activating the protection circuit.</li> </ul>	• First unplug the power cord, then twist the core wires tightly or terminate the speaker cables, then reconnect.	10
	• Speakers with an impedance other than specified are being used.	• Use speakers with the specified impedance.	10
	• Set is damaged.	• Turn off the power and contact a DENON service center.	_

#### [Remote Control Unit]

Symptom	Cause	Countermeasure	Page
Set does not work	• Batteries are worn.	• Replace with new batteries.	3
properly when remote control	• You are operating outside of the specified range.	• Operate within the specified range.	3
unit operated.	• Obstacle between main unit and remote control unit.	• Remove the obstacle.	3
	• The batteries are not inserted in the proper direction, as indicated by the polarity marks in the battery compartment.	proper direction, following the	3
	• The set's remote control sensor is exposed to strong light (direct sunlight, inverter type fluorescent bulb light, etc.).		3
	• The remote ID of the main unit and remote control unit do not match.		38, 67

## [Audio]

Symptom	Cause	Countermeasure	Page
No sound is produced from center speaker.	<ul> <li>You are playing a monaural source (TV, AM radio broadcast, etc.) in the STANDARD (Dolby/ DTS Surround) mode.</li> </ul>	other than "STANDARD" (Dolby/ DTS Surround).	44
No sound is produced from surround	• The surround mode is set to "STEREO", "DIRECT" or "PURE DIRECT".	• Set to a surround playback mode.	43, 44
speakers.	• The surround speaker's power amplifier is assigned to a different channel.	Check the setting and change it as necessary.	37
No sound is produced from	<ul> <li>Surround back speaker setting is set to "None".</li> </ul>	• Set to something other than "None".	28
surround back speaker.	• Surround mode not set to a mode for 6.1- or 7.1-channel playback.	• Select a surround playback mode.	43, 44
	• The surround back speaker's power amplifier is assigned to a different channel.	<ul> <li>Check the setting and change it as necessary.</li> </ul>	37
No sound is produced from	<ul> <li>Subwoofer's power not turned on.</li> </ul>	• Turn on the subwoofer's power.	-
subwoofer.		• Set to "Yes".	28
	• The subwoofer is not properly connected.	Check the connections.	9
	• The subwoofer's volume is turned off.	• Adjust the subwoofer's volume to an appropriate level.	62
No test tones are produced when main remote control unit's <b>TEST</b> <b>TONE</b> button is pressed.	<ul> <li>Surround mode not set to "STANDARD" (Dolby/DTS Surround).</li> </ul>	Set to the "STANDARD" (Dolby/ DTS Surround) mode.	43
DTS sound is not output.	• DVD player's audio output setting is not set to bitstream.	<ul> <li>Set the DVD player. For details, refer to the DVD player's operating instructions.</li> </ul>	-
	• DVD player is not compatible with DTS sound playback.	• Use a DTS-compatible player.	-
	• The AVR-4308Cl's "Decode Mode" setting is set to "PCM".	• Set to the "Auto" or "DTS" mode.	41
HDMI audio signals are not output from speakers.	The "Manual Setup" – "HDMI Setup" – "Audio" setting is set to "TV".	• Set to "Amp".	30

Symptom	Cause	Countermeasure	Page
No sound is output from the monitor connected with HDMI connections.	• The "Manual Setup" – "HDMI Setup" – "Audio" setting is set to "Amp".		30

# [Video]

Symptom	Cause	Countermeasure	Page
The on-screen display does not appear.	The format of the GUI and TV (NTSC or PAL) do not match.	Match the format of the GUI and TV.	37
No picture appears.	• The connections between the AVR-4308Cl and monitor are faulty.	Check the connections.	11 ~ 22
	• The monitor's input setting is wrong.	• Set properly.	-
	<ul> <li>PURE DIRECT mode is set.</li> <li>The player is connected using the component input connectors, the monitor is connected using the video (yellow) or S-Video output connectors.</li> </ul>	<ul> <li>Cancel the PURE DIRECT mode.</li> <li>High definition (1080i/720p) and progressive (480p/576p) video signals are not down-converted. Set the player to interlace (480i/576i) signals.</li> </ul>	43, 44 _
No picture appears	• The connections to the HDMI connectors are faulty.	Check the connections.	11
with HDMI connections.	<ul> <li>HDMI input setting is improper.</li> <li>The monitor is not compatible with copyright protection (HDCP).</li> </ul>	<ul> <li>Check the HDMI input setting.</li> <li>Connect a monitor that is compatible with copyright protection (HDCP).</li> </ul>	42 11
	• The HDMI format of the player and monitor do not match.	• Match the HDMI format of the player and monitor.	11
	• Depending on the monitor you have connected, the display may not be correct when you set to "Auto (Dual)".	Set to either "Monitor 1" or "Monitor 2".	30
Picture cannot be recorded.	<ul> <li>Input source does not match recorder's video connection connector (video or S-Video).</li> </ul>	• The video conversion function does not work for the REC OUT connectors. Match the input source and recorder connections.	15
DVDs cannot be copied on a VCR.	-	• This is not a malfunction. Most movie software includes copy prevention signals and cannot be copied.	_

#### [iPod]

Symptom	Cause	Countermeasure	Page
iPod cannot be played.	• The input source assigned to "iPod dock" is not selected.	<ul> <li>Switch to the input source assigned at "iPod dock".</li> </ul>	42
	• Cable is not properly connected.	Reconnect.	13
		• Plug the Control Dock for iPod's AC adapter into a power outlet.	_
